## **Options Book Revisions 2019-20**

- PAGE 2**      **Table of Contents changed to reflect adjustments in page numbers.**  
**Typos throughout the publication corrected.**
- PAGE 6**      **CVCC application dates adjusted to January instead of February**  
**Dates in College Credit Plus changed to next year's corresponding dates.**
- PAGE 7**      **Add the following:**

**BBHHS is excited to partner with Cuyahoga Community College to bring other college credit opportunities to our campus. For next year, College Algebra and Calculus III are being considered along with Organic Chemistry.**

- PAGE 18**      **ART**  
**Remove Yearbook from Art offerings and add it to English Department**  
**Remove Portfolio Prep course.**

- PAGE 28**      **ENGLISH**  
**Add new sequence chart below with same design as chart.**  
**Renamed Honors English 1 to Advanced Literature Survey.**  
**Revamped several course descriptions.**

### **PAGE 43 Revisions to German**

#### **German 1:**

German 1 is an introductory course that allows students to progress with beginning proficiency in speaking, reading, listening comprehension and writing. Students will learn about culture and talk about themselves and their families and make simple requests in the target language. Class is conducted in German. (Take out students are required to purchase a workbook.)

#### **German 2:**

German 2 is a continuation of German 1. This course stresses further development of the four skills: speaking, reading, listening comprehension and writing in order to attain a basic proficiency in the language. Students will learn about culture and be able to navigate common situations in Germany: buying tickets, reserving a room, as well as strengthen their skills in giving opinions and making requests. Class is conducted in German. (Take out students are required to purchase a workbook.)

#### **German 3 Honors:**

German 3 Honors continues to develop the four basic language skills. Students work to develop fluency through impromptu conversations, speeches, and introduction of more complex grammatical structures. (Take out: Contemporary themes are stressed in literature and conversation.) Students will be introduced to literature through fairy tales, short stories, and a radio play. Class is conducted in German.

#### **AP German:**

AP German Language & Culture will review and reinforce the grammatical and communication constructs needed to further develop the four skills: speaking, reading, listening comprehension and

# **Brecksville Broadview Heights High School**

## **Options Book Revisions 2019-20**

writing. A continued understanding of German Literature and increased fluency are simultaneous goals. Students will practice and review the format and exercises similar to those they will encounter on the AP German Language Examination.

### **PAGE 48**

**Add sequence chart as a whole page with the title: Math Sequence Options**

### **PAGE 51 Math**

**Add the New Course description below: (this course may be taught as a CCP course through Tri-C)**

#### **Calculus III**

Course Number: 2023AP

Course Length: year

Credits: 1.0

Fee: \$

Open To: juniors, seniors

Required: Graphing Calculator - TI 84 Plus recommended

Students will investigate multivariable calculus and various differential equations and/or linear algebra topics. The curriculum will help the student transition into math intensive majors in college. It includes vectors, parametric equations, analytic geometry of space, partial differentiation and multiple integrals.

Prerequisite: At least a 3 on the Advanced Placement Calculus BC exam

#### **College Algebra**

Course Number: 2014

Course Length: year (Tri-C portion in 2nd Semester)

Credits: 1.0

Fee: \$

Open To: students who meet the enrollment criteria for College Credit Plus

Topics include extensive function (linear, quadratic, polynomial, radical, roots, power, piece-wise, exponential, logarithmic) representation including verbal, numeric, graphic, and algebraic, identifying properties of the different function types, transformation of functions, solve linear, polynomial, rational, absolute value, exponential and logarithmic equations. Solve quadratic, polynomial and rational inequalities in one variable. Determine and graph conic sections, solve non-linear systems of equations and inequalities and solve systems of equations using matrices, arithmetic and geometric sequences and series. Includes applications and activities to build skills in problem solving.

Prerequisite: Algebra 2/Trig and acceptance into Tri-C by meeting CCP requirements.

### **PAGE 55-58 MUSIC**

Raised booster collected fees by \$5 in Orchestra(from \$25 to \$30) and \$10 in Choir(from \$25 to \$35).

### **PAGE 62 Add new course sequence chart**

# **Brecksville Broadview Heights High School**

## **Options Book Revisions 2019-20**

### **PAGE 66**

**Add the following new course**

#### **Organic Chemistry I**

Course Number: 2300

Course Length: year

Credits: 1.0

Fee:\$

Open To: Students who have completed AP Chem with a 3 or higher

Functional group chemistry of aliphatic compounds covering nomenclature, structural-reactivity, and synthetic reactions. Theoretical concepts, structural bonding, stereochemistry and reaction mechanisms emphasized. Use of various spectrometric techniques for identification of compounds introduced. Students may have the opportunity to receive college credit for the course.

### **PAGE 80 Social Studies**

Add Course sequence chart

### **PAGE 86 BUSINESS/TECHNOLOGY EDUCATION**

**Add the following new courses:**

#### **Robotics II**

Course Number: 6532

Course Length: semester

Credits: .5

Fee: \$25

Open To: all students in grades 9-12

Robotics II is a semester class dealing with problem solving by creating a robot to compete in several competitions. Design teams will work together in class competitions that will deal with design, gear ratio changes, programming, sensors, building and strategy utilizing the VEX Robotics system. The Robot you build will see how much weight it can pull on a weight transfer sled. It will also compete at a drag race where weight distribution and gear ratio will be a factor. The Robot will go through the design process to build.

#### **Fabrication and Design**

**Course Number: 6545**

Course Length: semester

Credits: .5

Fee: \$25 depending on projects chosen

Open To: all students in grades 9-12

This course is designed for every student in the school that has the desire to design and create. Students will be trained on all machines in the Fabrication lab, and use them to create the projects of their design. Equipment used includes Laser Engraver, 3D Printers and Scanners, as well as large format printer and vinyl cutter. The items produced are designed by the student and theirs to keep.

# **Brecksville Broadview Heights High School**

## **Options Book Revisions 2019-20**

### **Drone Technology**

Course Number: **6550**

Course Length: semester

Credits: .5

Fee: \$25 depending on projects chosen

Open To: all students in grades 9-12

This course is an overview of unmanned aircraft, known as drones, that includes history, trends, capabilities and performance, uses and career opportunities. Students will undergo ground school, where they learn the key content about drones. Students will also learn to pilot a drone, in class, during flight school. By the end of the course will have the knowledge to take the FAA drone certification test to become a licenced pilot if desired.

### **Engineering Design Team**

Course Number: **6542**

Course Length: semester

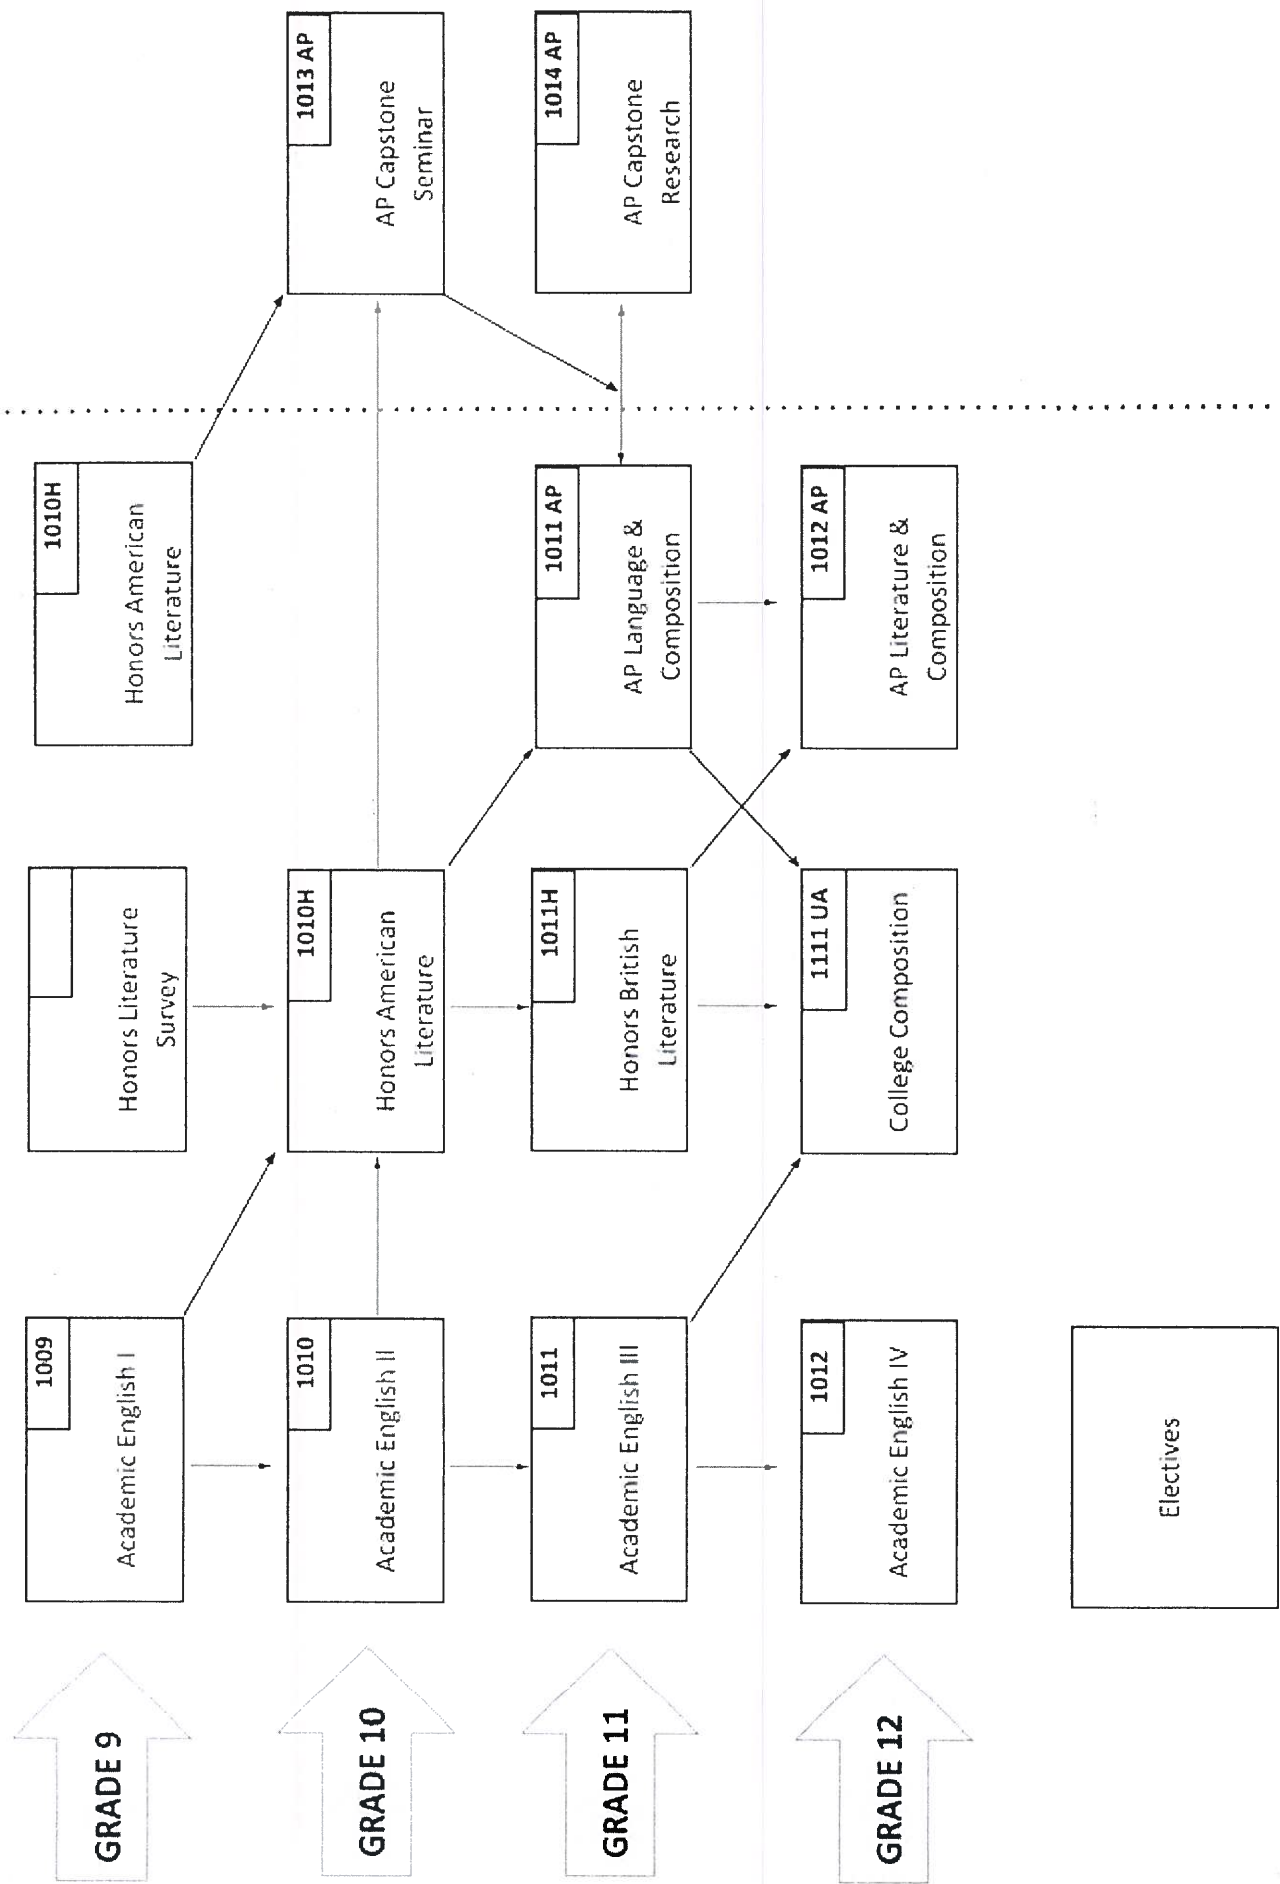

Credits: .5

Fee: \$25 depending on projects chosen

Open To: all students in grades 9-12

This course allows you to further develop knowledge from Engineering CAD I & II. Students are able to work together in smaller groups to solve problems as a design team. Some examples of potential projects could include but are not limited to: architecture, drones, robotics, and product design. The format of this class mimics the design teams students will experience at the college level or in future careers.
