If busing is available at the regularly scheduled time, are you open to a late start one day each week, perhaps, on Wednesday, at the HIGH SCHOOL? This means, students would start two hours later and end at

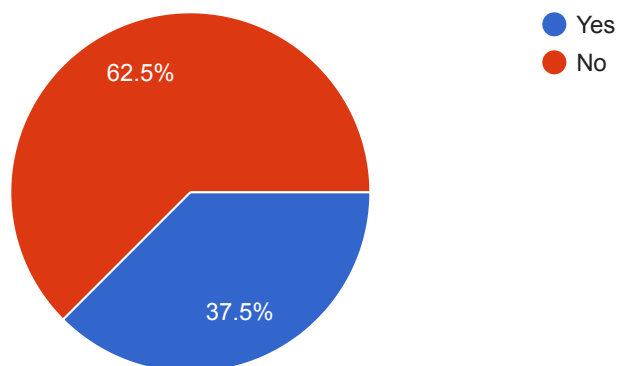

the same time. Students who need to ride the bus would have a two hour study hall every week.

In your opinion, would you be more likely, or less likely, to support a

staggered release time at the HIGH SCHOOL, where bus riders would be released approximately 10 minutes earlier than students who drive, are picked up, who walk or bike to and from school?
