

Project SEARCH Answers to Questions

This program provides students with an internship type vocational experience. Participation in the program is for students that the IEP team and/or transition/vocation coordinator determine would be appropriate for a work-based setting for vocational skill training.

The program is set-up similar to an apprenticeship/internship. The students participate in three (3) different work/job setting rotations. The training consists of a teacher and job coach that work in partnership to teach vocational skills and support the students in the various work/job settings.

The excess cost is for the teacher cost and is divided among the districts that have a student(s) in the program. The cost of the job coach is provided through OOD. This particular program is through Parma City Schools and therefore the agreement is between their district and ours as we have one (1) student participating.

Such a program is an option for students with disabilities to participate in a vocational work setting as part of their school program. This option is an appropriate school-vocational option for students that have obtained work/job skills through vocational programs (e.g., CVCC) and benefit from this program as a final transition to post-secondary.

The agreement is on this board agenda as it was not received until September from the partnering district.
