**Re: Home Bleacher Renovation & Hillside Stabilization
Brecksville-Broadview Heights Stadium**

Dear Mr. Coad:

Scope of Work - Update

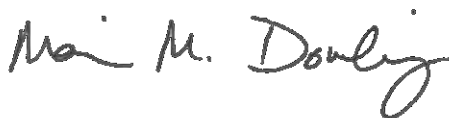

Update of the professional services related to two current issues at Brecksville-Broadview Heights Stadium.

1. Stabilizing the existing home bleachers, preventing any further movement forward. In addition to this stabilization, we will work with a bleacher company to remove the existing front of the bleacher and add handicap seating with ramp and stair access.
 - a. Dant Clayton is expecting their initial cost for a direct contract through Sourcewell at approximately \$205,000.
 - b. Behnke will work with Barber and Hoffman to design the hillside stabilization. With approximately 220 linear feet of wall, at approximately \$200/lf, we anticipate this cost is approximately \$45,000. Dant Clayton will add this wall to their direct contract through Sourcewell.
2. The second issue is stabilizing the existing sloping hillside on each side of the existing bleacher.
 - a. We will not have any additional budget funds for site fencing, hillside stabilization outside of the bleacher or concrete at the top edge of the bleachers.
 - b. An additional \$10,000 fencing allowance would add approximately 200 lf of new 6', black vinyl fencing to this project to update perimeter fencing at the stadium.

If you have any questions, or need additional information, please call me.

Sincerely,

BEHNKE ASSOCIATES, INC.

Marie M. Dowling, ASLA
