Current Forecast Results through December Total Revenue, Total Expenditures, Cash Balance

The district's cash balance at the end of FY 2019 was \$17,475,486 and is projected to decline -\$9,945,937 to \$7,529,549 by FY 2024. The district's revenue shortfall is expected to be -\$5,733,013 in FY 2024. Revenue cash flow for the current fiscal year is trending favorable (see page 4). Expenditure cash flow for the current year is trending unfavorable.

The forecast matches the revised five-year forecast the Board adopted in October.

Current Forecast -- Projected Revenue Surplus/(Shortfall) by Year					
Includes Applicable Renewal Levies			Does not include proposed new levies.		
	FY 2020	FY 2021	FY 2022	FY 2023	FY 2024
Revenue Over/(Under)					
Expenditures (Line 6.01)	1,604,706	(133,806)	(1,944,744)	(3,739,080)	(5,733,013)

Note: The above forecast may reflect updates due to actual cash flow results or other internal/external variables.

The district is projected to spend \$9,945,937 more than its revenue through FY 2024.

Year-Over-Year Cash Balance Comparison

	FY 2019	FY 2020	Yr-Over-Yr Change
December, End of Month Cash Balance	14,547,413	17,893,279	3,345,866

Actual revenue for the month was up \$112,642 compared to last year. While actual revenue for the month was over the estimated. Actual expenditures for the month were down -\$669,893 compared to last year. Actual expenditures for the month were under the estimate. The district's cash balance is up \$3,345,866 compared to last year.

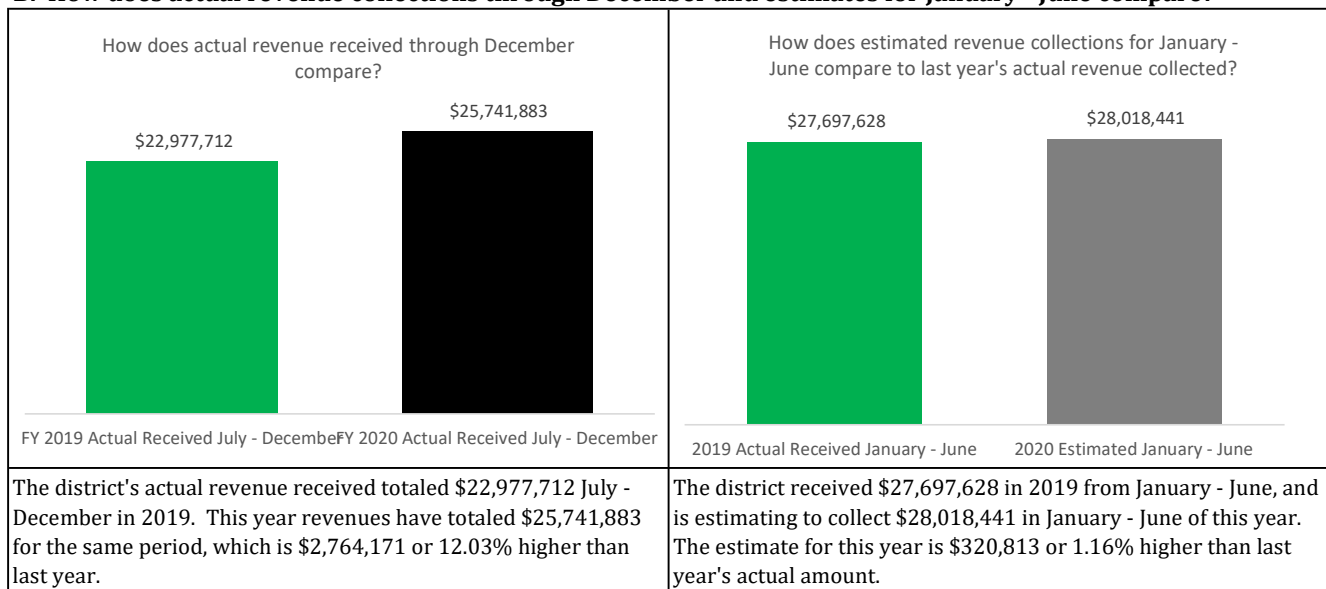

Revenue for the month of December exceeded the estimate due to higher than estimated refunds of prior year expenditures (RCPT 5300).

Expenditures were lower than estimated by \$567,708 with capital outlay having the largest variance. This appears to be a correction of expenditures posted in August. In addition, salaries were less than estimated cashflow and needs to be researched to determine if this would require an adjustment to the forecast. The benefits variance is related to the Worker's Compensation premium not posting in December. This should resolve itself in January.

A. How does revenue received through December compare to the average of the three prior year average?

B. How does actual revenue collections through December and estimates for January - June compare?

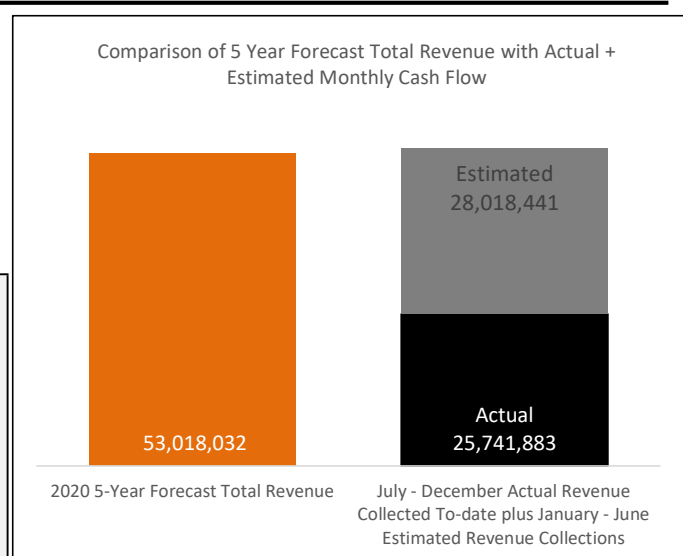

C. Does through December actual revenue collections plus January - June estimated to be collected support the current FY 2020, 5-Year Forecast total revenue amount?

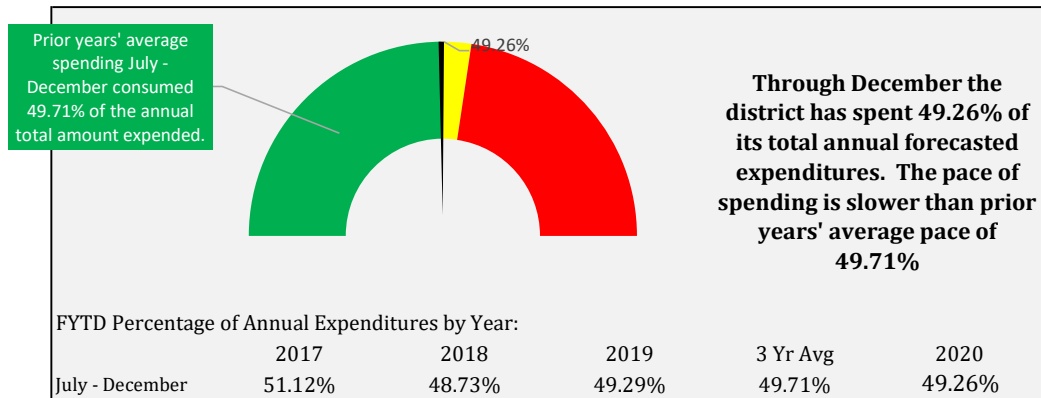

The district's 5-year forecast for FY 2020 total revenue is \$53,018,032 which is -\$742,293 under the cash flow total of 53,760,325.

Revenues are running ahead of the pace from prior years because of real estate collections increase from last year and larger than anticipated refunds of prior year expenditures.

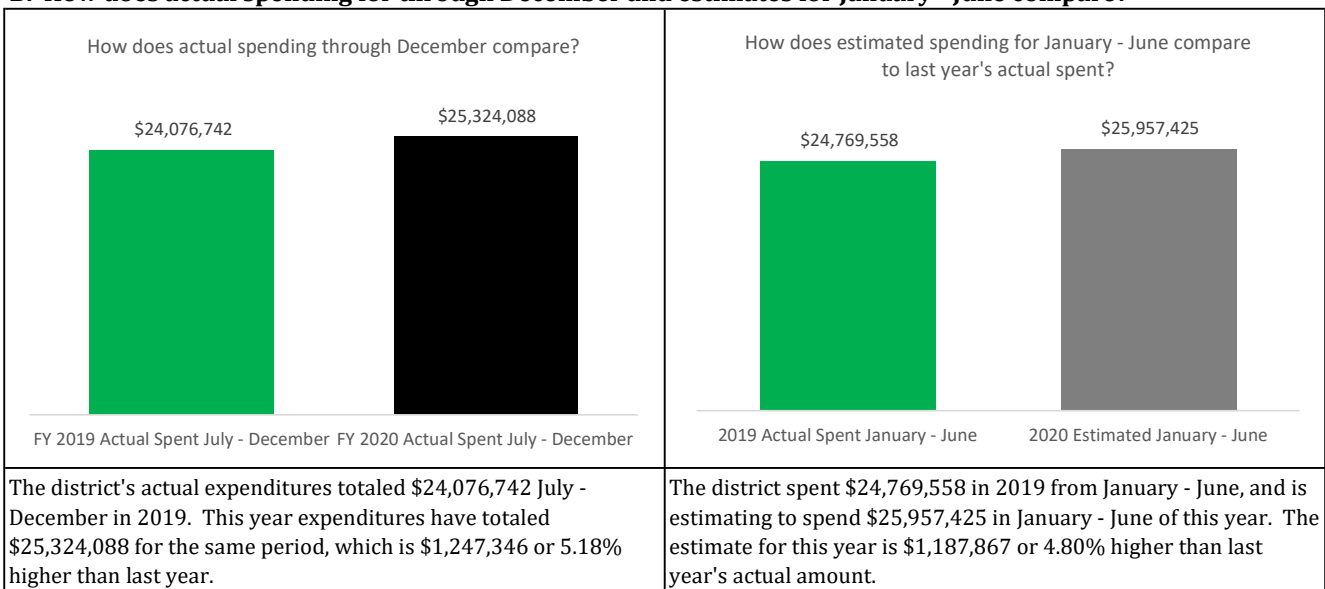

The refund of prior year expenditures will likely improve the forecast bottom line in FY 2020 and beyond.

A. How does the pace of spending through December compare to the three prior year average?

B. How does actual spending for through December and estimates for January - June compare?

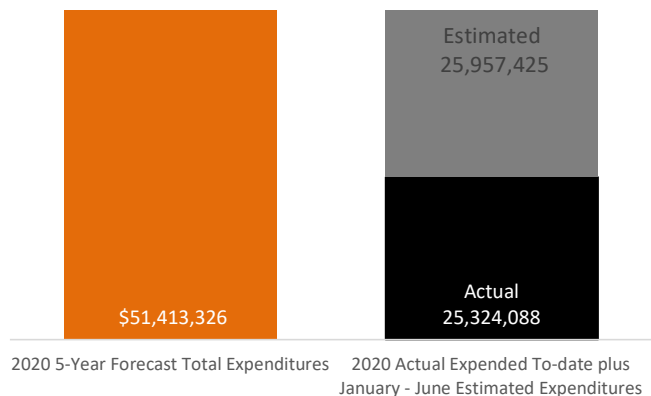

C. Does through December actual expended plus January - June estimated support the current FY 2020, 5-Year Forecast total expenditure amount?

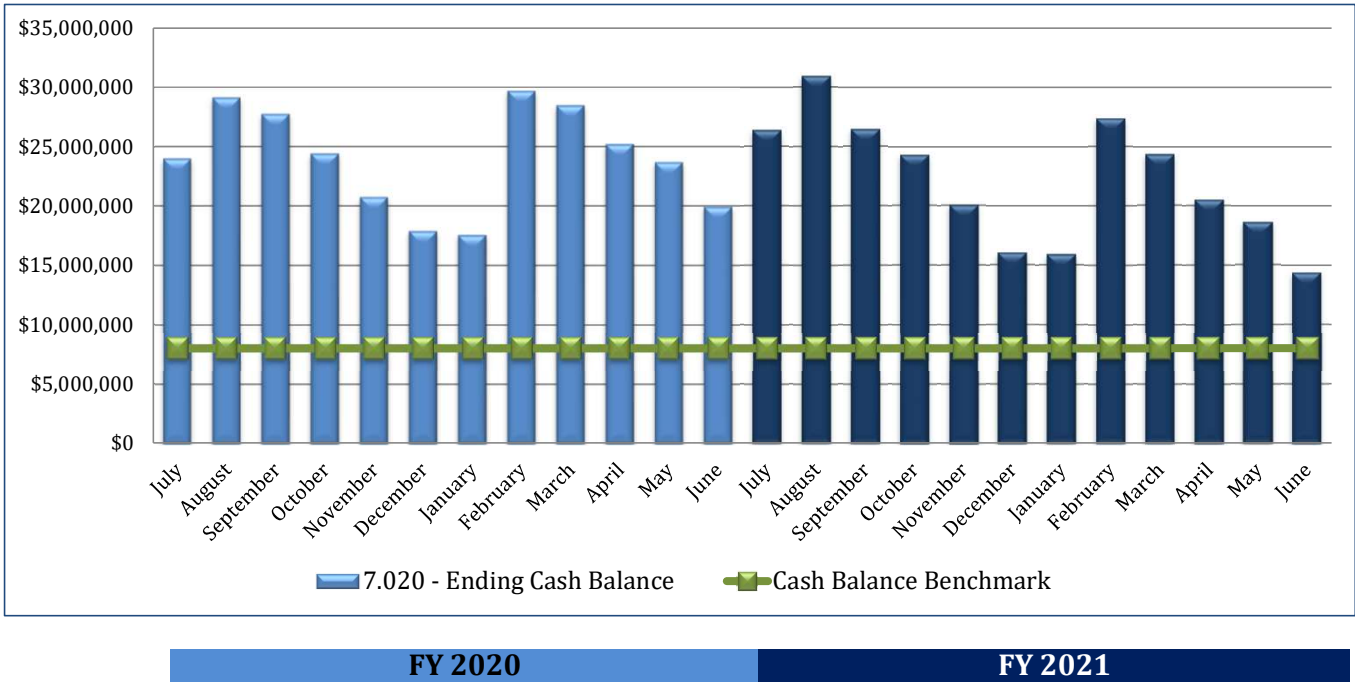

The district's 5-year forecast for FY 2020 total expenditures is \$51,413,326 which is \$131,813 over the cash flow total of 51,281,513.

Expenditures are running slightly less than the annual forecasted total. This favorable cash flow trend through December could be an issue of timing and will be monitored.

Comparison of 5 Year Forecast Total Expenditures with Actual + Estimated Monthly Cash Flow

Monthly Cash Balance Projections
Based on Annual Totals From 5 Year Forecast

The district's cash balance is above cash balance policy levels through FY 2021.
