Ms. Joelle Magyar, Superintendent
Brecksville-Broadview Heights City School District
6638 Mill Rd.
Brecksville, OH 44141

Proposal for Special Education Assessment

Dear Ms. Magyar,

American Educational Consultants would be pleased to provide professional services to Brecksville-Broadview Heights City Schools. We believe our service is the best qualified to perform this Special Education Audit for your school district because: (1) as a national/international consulting service we provide objectivity and a resource of experiences not typically found locally; (2) this same service was found quite useful in Ohio and other parts of the country; and (3) we, can compare your special education costs and student achievement to objective and recognized standards, identify areas of commendation and opportunities for improvement fiscally and programatically and help design a plan for the district to provide the highest quality instruction at the lowest costs to taxpayers.

We believe we can help your schools and provide the following professional service through myself as project manager and lead consultant, and our data, program and special education consultant-specialists in a timely manner within a 9-10 week window as stated herein. The information contained on the subsequent pages is based on your stated objectives; the costs for collating your hard and anecdotal data; visiting your school and interviewing administrators, teachers and parents; doing a feasibility analysis of all recommendations; and presenting to you a thorough set of charts and narrative in a final report.

Specifically you would be served through:

American Educational Consultants
5180 River Trail
Cleveland, OH 44124

By (resumès attached):

Amy Brodsky, Managing Consultant

Valerie McKenney, Administrative and Program Consultant

Gillian Dillard, Special Education Consultant

Jerry Brodsky, Administrative and Data Consultant

If you require any additional materials please do not hesitate to contact us.

Sincerely,

A handwritten signature in cursive script, reading "Faith Brodsky Racusin".

Faith Brodsky Racusin, Chief Executive Manager
American Educational Consultants

American Educational Consultants proposes a multi-tiered approach to determining a district-wide action plan in order to ensure the Special Education Program more effectively and efficiently provides services in compliance with district, state and federal laws, rules and regulations utilizing best practices.

Data Collection and Analysis

- I. Assumptions
 - a. Data is available, inasmuch as possible in electronic form, locally and is awaiting collation and analysis.
 - b. Statewide data is available and is capable of matching data needs with respect to questions presented by district for analysis.
- II. Preparation
 - a. We would gather national data for comparison purposes.
 - b. We would use our templates for cost/benefit charting to discern differential trends between local programs and state and national best practices.
- III. Action Steps
 - a. Interview key Brecksville-Broadview Heights City School District educators for introductory dialogue regarding their preliminary perspective on the issues and questions.
 - b. Interview others, including staff, focus groups of parents and others, as requested and arranged by Brecksville-Broadview Heights City School District.
 - c. Chart local data on templates that allow for interpretive analysis of program costs/benefits and anecdotal evidence on user-friendly Excel graphs/charts which could be easily adapted for reporting to all interested constituencies.
 - d. Chart state and national data on templates that allow for comparison of local costs/benefits and anecdotal evidence in relation to the school's programming expectations.
 - e. Analyze local, state and national data for significant points of disparity in costs/benefits utilizing the *ingredients method*, putting together cost ingredients including instructional, administrative, and other staffing, as well as facilities, equipment, and supply costs.
 - f. Develop preliminary report commendations and recommendations based on the above data, comparison results and key leader responses to interview questions.
 - g. Conduct feasibility analysis of preliminary report, program commendations and recommendations, adjusting the recommendations to maximize program cost reductions/containment and educational benefit increases/maintenance.
 - h. Finalize report with findings and program recommendations, and present to Brecksville-Broadview Heights City School District, at time/place agreed upon.
- IV. Expected Outcomes
 - a. On time, clear and specific, feasible and practical, program findings that produce commendations that identify the strengths in Brecksville-Broadview Heights City School District's Special Education Program and recommendations that maximize the educational opportunities and success for special education students in Brecksville-Broadview Heights City School District.

During the above metric and anecdotal data gathering, the following would be addressed:

- a. Analysis regarding the degree to which Brecksville-Broadview Heights appears to be in compliance with current Ohio special education laws and regulations.
- b. Evaluation of the perception of parents and other community members of, for example, the management style of the principal(s) and special education director/coordinator/department heads(s).
- c. Assessment of parental satisfaction with special education services and programs.
- d. Review of reading and mathematics programs available to students with verification as to the effectiveness of particular programs for specific types of disabilities. Include a review of studies that verify the reading and mathematics approaches currently in use at Brecksville-Broadview Heights, in order to provide staff, Board and parents with current information, including evidence-based data on instructional approaches.

Specifically American Educational Consultants would:

- a. Review district data, if available, including data on sub-groups and individual students with IEPs, looking at a 3-5 year window.
- b. Sample randomly 6-8 student files for IEP compliance and related paperwork.
- c. Conduct structured interviews with Principals and Director of Pupil Services and with selected special and general education staff and parents.
- d. Conduct focus groups of parents and staff and structured interviews with Board members, if requested.
- e. Review the school's reading and mathematics program, to answer the following:
What reading and mathematics programs/approaches are currently available to all students? What happens to students who are struggling to read?
- f. How are decisions (re: reading and mathematics approaches) determined for non-IEP students?
- g. What process does the IEP team use to determine changes to reading and mathematics approaches for students with IEPs? How is success measured (and reported to parents) for reading and mathematics?
- h. Review previous files and past documentation.
- i. Examine if remedial programs utilize systematic, research-based practices with consistency of mapping over time a child's tenure at Brecksville-Broadview Heights.
- j. Examine what/which metrics (testing) have been and are used to measure achievement in terms of grade level and percentiles? Do these identify gaps and areas needing focus?
- k. What is frequency of testing? Are trends being established and used to craft specific programs for individuals? IEP goals? Are tests conducted by properly trained evaluators?
- l. Review capacity of Brecksville-Broadview Heights to offer services required by law including the adequacy of certified teachers to meet IEP service demands. Assess if individualized instruction is properly structured and supported to include a student in general curriculum. Assess administrative support in identifying students with special service needs. Assess administrative support for the special education referral process. Assess access to training, tools, resources and professionals in the field to better support the academic achievement of children.

- m. Provide a detailed review of communication protocols between Brecksville-Broadview Heights City School District, families and extended service providers. Is communication/response to inquiries/required services evident in a timely fashion? Examination of the rate of successful/unsuccessful and timely implementations of meeting notices, IEP deadlines, implementation of IEP goals and protocols, adherence to safety guidelines, etc. At any time have families, parents and community members concerned about Special Education supports and services asserted that they and/or the student have been discriminated against or denied inclusion into the greater Brecksville-Broadview Heights City School District community?
- n. Examine the type and frequency of the periodic testing of students that is used to monitor progress and trends and highlight areas needing improvement. Review systems used to address gaps and areas needing remediation.

Additional areas to be included in the independent review:

- a. Overview of Brecksville-Broadview Heights's inclusive practices – ownership shift has become shared between general educators and specialists over time for students with special needs throughout the grades – Least Restrictive Environment.
- b. Review of the degree of implementation and integration of Response to Intervention strategies.

Work Plan and Timeline

I. Assumptions

- a. Project is approved and project timeline begins after school communicates said approval to American Educational Consultants and identifies process for transfer of local data.
- b. Brecksville-Broadview Heights City School District key leaders and representatives of constituencies are available during a four-day period during weeks one to three, after timeline begins, to provide introductory responses to specific abovementioned questions.
- c. Brecksville-Broadview Heights City School District key leaders are available during Week 7/8, to provide input regarding the feasibility of the preliminary report and draft recommendations being prepared.
- d. American Educational Consultants will have its regional representative available to be on-site up to two additional days during the project timeline, if necessary.

II. Preparation

- a. American Educational Consultants staff will meet and confer on all scheduling details to insure the project begins, proceeds and ends on time and in a manner consistent with the expectations of both American Educational Consultants and Brecksville-Broadview Heights City School District.
- b. Work and travel assigned and scheduled.
- c. Action step monitoring will be put in place consistent with high quality expectations.

III. Action Steps

- a. Week 1-3
 - i. Meet with local key school leaders and constituency representatives to discuss project and responses to specifically designed questions.
 - ii. Conduct interviews and focus groups as arranged by Brecksville-Broadview Heights.
 - iii. Gather local and national data; make contact with state department for state data match; review initial data.
- b. Week 2-4
 - i. Conduct full data review.
 - ii. Prepare visual data comparison charts from templates.
- c. Week 4-5
 - i. Analyze and compare national/state/local information regarding programming cost-benefits.
 - ii. Begin to identify trends and base program recommendations.
- d. Week 5-6
 - i. Continue identification and development of recommendations
 - ii. Finalize draft program recommendations.
- e. Week 7-8
 - i. Conduct feasibility analysis of preliminary report, findings, commendations and recommendations.
 - ii. Meet with local key school representatives to identify factors that might affect program findings, commendations and recommendations.
- f. Week 8-10
 - i. Adjust, as needed, program commendations and recommendations based on information received during feasibility analysis to maximize program cost reductions/containment and educational benefit increases/maintenance, and respond to each item listed above.
 - ii. Provide up to 10 hard copies and one digital copy of final written report on time no later than agreed upon date. On-site local presentation of final report to staff and/or school board may be arranged.

IV. Expected Outcomes

- a. Interaction with staff as expected by Brecksville-Broadview Heights City School District, at beginning, middle and end of the project.
- b. Deliverables at any stage of the work as requested by Brecksville-Broadview Heights City School District consistent with action steps timeline delineated above.
- c. On time, clear and specific, feasible and practical, program findings, commendations that identify the strengths in Brecksville-Broadview Heights City School District's Special Education Program and recommendations that maximize the educational opportunities and success for special education students in Brecksville-Broadview Heights City School District.

Cost Proposal

	Billable Time Costs	Travel	Supplies	Total
Project Manager	\$11,750	\$325	\$300	
Admin Consultant	\$8,000	\$2,225	\$0	
SPED Consultant	\$8,000	\$2,225	\$0	
Admin Consultant	\$8,600	\$275	\$0	
Data Consultant	\$7,000	\$0	\$0	
Totals	\$43,350	\$5,050	\$300	\$48,700

The above cost proposal is a *not-to-exceed* quote. Upon approval of the project, a deposit of \$6,000 will be invoiced to Brecksville-Broadview Heights City Schools. The remainder of the project costs would be billed at the completion of the project for the billable time, travel and supplies actually incurred for the project, again, not to exceed the total proposal quote.

Bidder Qualifications

American Educational Consultants was founded by Jerry Brodsky, with over 40 years of experience in public education and school law, to provide an opportunity to connect clients with the highest quality professionals in the field. The firm provides educational and legal consultative services to school districts, school personnel, attorneys needing specific educational expertise, parents and students.

Clients using the services of American Educational Consultants within the past several years include: Agora Cyber Charter School and PA Cyber Charter School (PA), Reading Public Schools (MA), East Cleveland Schools, Louisville Schools, Groveport-Madison City Schools, Mayfield City Schools, Menlo Park Academy, Monarch School for Adoption, Autism and Foster Care, Bellbrook-Sugarcreek Public Schools (OH), Chula Vista Schools (CA), Albany Leadership Charter High School for Girls (NY), Dover, Rochester, SAU#44 and #14 Public Schools (NH), Teaneck Public Schools (NJ), Lewiston and Portland City Public Schools (ME), Clark County, Jystrup Elementary School (NV) School District, Bachesehir Koleji Schools (Istanbul, Turkey), Blue Ribbon Schools of Excellence, Inc., and individual parents needing legal and educational advocacy for their children.

American Educational Consultants has the ability to provide from as few as one to as many as dozens of consultants to complete a task in any educational arena in the world, having visited, studied, and/or consulted for schools, students and parents in the United States, Canada, England, China, the Middle East, Europe and Turkey.

Several of the above clients specifically contracted with American Educational Consultants for Special Education Analyses similar in scope as to that being requested by Brecksville-Broadview Heights Schools at this time.

Procuring an independent review of a district's special education programming and making data-driven program decisions to produce an efficient and effective array of special educational services, is a bold and appropriate step for a school district. This project is very attractive to our consultants as it has become a specialty niche for us.

Our team consists of experienced administrators and school personnel with strong background in educational finance, special education leadership and program development, and school/special education law.
