Art Foundations -Changing from year long course to 2 semester courses with following descriptions:

Art Foundations 2D

Course Number: 7012

Course Length: Semester

Course Credit: .5 NCAA Eligible(pending) & NHS Eligible

Open To: Freshmen, sophomores, juniors and seniors

In this class, students are exposed to a full range of two-dimensional art experiences. This may include drawing, painting, printmaking, and basic design. This course is designed as a workshop environment and includes aesthetics, criticism and art history. This foundation course is strongly recommended for those students who wish to continue study in any of the other art offerings.

Prerequisite: None

Art Foundations 3D

Course Number: 7013

Course Length: Semester

Course Credit: .5 NCAA Eligible(pending) & NHS Eligible

Open To: Freshmen, sophomores, juniors and seniors

In this class, students are exposed to a full range of three-dimensional art experiences. This may include ceramics, sculpture and paper mache. This course is designed as a workshop environment and includes aesthetics, criticism and art history. This foundation course is strongly recommended for those students who wish to continue study in any of the other art offerings.

Prerequisite: None

Added: AP Studio Art: 3D Design

Course Number: 7056

Course Length: Year

Course Credit: 1.0 NCAA Eligible(pending) & NHS Eligible

Open To: sophomores, juniors and seniors

AP 3-D Art is a year-long course designed to challenge students in an advanced level of artistic development and technical proficiency. This course is the highest level of achievement for students interested in the areas of ceramics and sculpture. Students in this course are required to submit a portfolio which represents a body of 3-dimensional work. Students should consider how materials, processes, and ideas can be used to create works of art that involve space and form.

Prerequisite: Foundations 3D, Ceramics, and Sculpture and/or art teacher recommendation

Update to AP 2D and AP Drawing:

Brecksville Broadview Heights High School

Options Book Revisions 2021-22

Prerequisite: 4 semesters of art classes in addition to art teacher recommendation

Update to Intermediate Art:

Prerequisite: 2 semesters of art classes

Business

Added: AP Computer Science A

Course Number: 6028

Course Length: year

Credit: 1.0 - NCAA Eligible(pending) & NHS Eligible

Open To: Freshmen, sophomores, juniors and seniors

AP Computer Science A introduces students to computer science through programming. Fundamental topics in this course include the design of solutions to problems, the use of data structures to organize large sets of data, the development and implementation of algorithms to process data and discover new information, the analysis of potential solutions, and the ethical and social implications of computing systems. The course emphasizes object-oriented programming and design using the Java programming language.

Math

Added: Modeling and Reasoning

Course Number: 2009

Course Length: year

Credit: 1.0 - NCAA Eligible(pending) & NHS Eligible

Modeling and Reasoning is an advanced quantitative reasoning course. Quantitative Reasoning is the application of basic mathematics skills, such as algebra, to the analysis and interpretation of quantitative information (numbers and units) in real-world contexts to make decisions relevant to daily life. Critical thinking is its primary objective and outcome. It emphasizes interpretation, representation, calculation, analysis/synthesis, assumptions and communication. This course is designed to promote reasoning, problem-solving and modeling through thematic units focused on mathematical practices while reinforcing and extending content in Number and Quantity, Algebra, Functions, Statistics and Probability, and Geometry. It is a yearlong course taught using student-centered pedagogy. This course will prepare students to enter directly into a credit-bearing math course at the postsecondary level or to go directly into a career field.

Prerequisite: Successful completion of Algebra 1 and Geometry

Added: Data Science Foundations

Course Number: 2035

Course Length: year

Credit: 1.0 - NCAA Eligible(pending) & NHS Eligible

Brecksville Broadview Heights High School

Options Book Revisions 2021-22

Data science is a blend of quantitative reasoning, statistics and computer science to gain meaningful insights from data. The difference between data science and statistics is that where statistics focuses on explaining the data, data science focuses on using data to make predictions and decisions. Students will reason with and think critically about data in all forms. They will develop their understanding of data analysis, sampling, correlation/causation, bias and uncertainty, probability, modeling with data, making and evaluating data-based arguments, the power of data in society and more.

The course teaches students to reason with and think critically about data in all forms. Ohio's Learning Standards for Mathematics relevant to data science are taught along with the data demands of good citizenship in the 21st century. It includes things such as describing big data; usability and usefulness of data; structured vs unstructured data; data extraction techniques; data storage; privacy issues; and data mining.

Prerequisite: Successful completion of Algebra 1 and Geometry

As a result of redesigning the curriculum, the following courses will not be offered next year:

College Algebra #2014 and College Trigonometry #MATH 1540-enrollments have been low the past two years.

Pre-Calculus Course #2016. Still offering Honors PreCalculus

Algebra 2 Course # 2010 Instead, students will have the option to take one or both of the new courses listed above.

Algebra 3/Statistics Course #2034 Instead, students will have the option to take one or both of the new courses listed above.

PE

Adding: Teammates

Course Number: 8030

Course Length: year

NCAA Eligible(pending) & NHS Eligible

Credit: .25 -

This course is designed to provide an inclusive experience for all students with a variety of activities designed for fitness, team building and skill building. Non-disabled students should volunteer and show a desire to participate in the class based on a desire for exercise and to be part of a team. One day per week, an Intervention Specialist will work solely with nondisabled students on topics including: disability awareness, inclusion, being a leader, how to help by enabling others, acceptance and equal access, ADA and rights of people with disabilities, confidentiality, etc.

Science

Brecksville Broadview Heights High School
Options Book Revisions 2021-22

Remove: Honors Physical Science Course #3002H has not been offered for 6 years so it's being removed from the guide.
