

Resolution of Urgent Necessity, Waiving Competitive Bidding, and Authorizing Replacement of the Brecksville-Broadview Heights High School Domestic Hot Water System

Whereas, the current domestic hot water system for the high school is approximately 25 years old and is in need of replacement, the high school domestic hot water system being of such a nature that it supports the public health of those using the facility, to insure that the domestic hot water system replacement occurs prior to the start of the 2021-2022 school year,

Whereas, the District has determined that there is not sufficient time, availability of equipment or contractors to competitively bid replacement and redesign of the existing domestic hot water system, to insure the replacement of the domestic hot water system has limited impact on the student population and school building staff,

Therefore Be It Resolved that based on the need to ensure hot water is available to all high school patrons in support of school operations; the Board of Education, pursuant to the authority granted by Ohio Revised Code Section 3313.46, waives competitive bidding and authorize the Superintendent to enter into an agreement with a qualified contractor and proceed with work as soon as possible so that the high school domestic hot water system will function in compliance with current governing building codes and provide hot water to school building patrons without interruption to school operations.
