

TECHNOLOGY UPDATE

2021-2022 School Year

Network Assessment Key Themes

- **IT operations need to be more proactive and aligned with District's Business needs**
 - Recommended staffing 7-8 technology staff
 - Expected total salary in the range of \$550,00-\$650,000 for recommended staff
- **Current technology staffing**
 - 4 technology staff and contracted services
 - Total salary and expenditures on contracted technical services is less than \$350,000

Network Assessment Key Themes

- **Exposure relating to business continuity**
 - Need for back up testing to ensure continuity
 - Challenges related to testing in the previous server environment
- **Updated server environment**
 - Updated server environment allows for a large number of disaster recover options
 - Server environment upgrade is in progress

Network Assessment Key Themes

- **Lack of details regarding new elementary school technology**
 - Equipment specification, procurement, installation and testing are key projects that have yet to be planned
- **New elementary technology planning**
 - Network specifications and equipment have been identified
 - Classroom technology specifications are being reviewed to assure the most current technology is being implemented

High Level Risks

- **Migration to Windows 10**
 - Complete
- **Redundancy at District Gateway**
 - Complete redundancy is costly
 - Redundancy in hardware will be complete this summer
 - Firewall replaced
- **Network monitoring and management**
 - Using available tools and personnel to monitor network

High Level Risks

- **Wireless network design improvement**
 - Combination of Erate and Ohio Connectivity Grant funds are being use to completely redesign the wireless network in middle school, high school and board office
 - Expected completion July 31, 2021
 - Erate funds are being used to carry new wireless design into the new elementary school

Medium Level Risks

- **Formal backup and recovery procedure**
 - Backup system is in place
 - Improvements are still being made as new servers are brought online
- **Business continuity plan**
 - Evolving as the network and servers are updated
 - Final product will be a collaboration among all operations department

Medium Level Risks

- **District credentials on the dark web**
 - Ongoing issue
 - District performs regular scans and enforces strong password requirements
- **Create formal policies and procedures**
 - Addition of contracted services gives the district redundancy in the areas of IT leadership, network engineering and programs management
 - Formal procedures are in constant development

Medium Level Risks

- **Address physical risks and exposure in server/network rooms**
 - Projects are in development with facilities to address physical security and power back up
- **Conduct regular vulnerability testing**
 - Network audits are performed on a regular schedule to identify vulnerabilities
 - Firewall is now monitored by BBHCSD staff and Connect staff

What's new in technology

- **Financial**

- Recovered nearly \$60,000 in additional money related to previous Erate project
- Used Erate funds to purchase more than \$185,000 in network equipment for new elementary school
- Used Erate funds to purchase more than \$335,000 in network equipment and cabling for existing school buildings
- Used Ohio Broadband Connectivity Grant funds to purchase and install more than \$65,000 in external wireless access points throughout the district

What's new in technology

- **Equipment**

- Configured and deployed 350 laptops to teachers for mobile instruction
- Configured and deployed 600 touch Chromebooks to primary grades
- Setup and deployed 200 wireless microphones, cameras and tripods for distance learning
- Designed, configured and implemented new Active Directory environment for all users
