Re: Proposal for Landscape Architectural Services for the rehabilitation of an existing Eight Lane, All-Weather Track at Brecksville-Broadview Heights High School Stadium

Dear Mr. Coad:

Thank you for the opportunity to further develop our highly valued relationship with Brecksville-Broadview Heights High School. Behnke Landscape Architecture proposes the following professional services relative to the rehabilitation of an eight lane, all-weather track and south D-Area located at Brecksville-Broadview Heights High School Stadium.

Behnke Landscape Architecture is the Cleveland based leader in the design and implementation of all-weather tracks. With over forty new and renovated tracks across Ohio and Pennsylvania, we pride ourselves with the experience and knowledge to quickly resolve any project issues during design or construction to keep our projects on budget. We are currently engaged with the University of Akron, leading the rehabilitation of the Lee Jackson Track Facility. Our qualifications are attached.

Scope of Work

We understand that we will provide technical specifications and construction documents for a rehabbed eight lane all-weather track and south D-area. We will scrape the existing track surfacing, grind or mill the existing asphalt surface to allow for at least 1 ½" of asphalt, prior to adding all-weather surface. Prior to surfacing, we will walk the track and mark all areas for crack repair and full depth replacement. We will include allowances for track repair in the bid, full depth replacement and for a scratch coat to ensure the track planarity prior to all-weather surfacing. We have identified an area of asphalt heaving on the visitor side of the track that will require full depth replacement. We anticipate bidding a polyurethane structural spray track surfacing.

At the south D area, we will look at resurfacing the high jump and pole vault as a base bid item. We will add an alternate bid for removing all lawn areas and topsoil, replacing those areas with asphalt.

At the north D area, we will include resurfacing the double long jump runaways as a base bid item. In addition, we will include an alternate bid for sealing the existing asphalt at the north D area.

Surrounding the track, we will include an alternate bid for removing lawn areas between the track and existing field fencing, extending asphalt to the existing asphalt walks and visitor bleacher and running a new 4' black, vinyl chainlink fence surrounding the track, where we remove lawn. The new fence will be a minimum of one meter from lane 8, as recommended by NFHS.

For the scope of work listed above, we will provide the following services and deliverables:

1. Rendered site plan
2. Site preparation plan(s)
3. Site layout plan(s)
4. Site grading plan(s)
5. Site details covering all scope of work items listed above.
6. Subconsultants for both survey and geotechnical investigation.
7. Meetings: Behnke Landscape Architecture will be available to attend the following meetings:

- a. As required.
8. Construction documents at the following stages of development:
 - a. Design development – Drawings & Outline Specifications
 - b. Construction documents – Construction Drawings and Technical Specifications
9. Cost estimating and Budget Reconciliation at the following project phases: Design Development, Construction Documents.
10. Bidding: Answer questions, provide clarifications, and prepare addenda as required. We will conduct the bid opening and provide the bid results with a bid recommendation.
11. Construction and Close-out: Conduct regular field visits, Answer RFI's, review shop drawings, and provide clarifications. We will process payment applications and prepare a prepare project closeout documents. We will work closely with the selected contractor for a successful project.

Not included in our scope of work is responsibility for: SWPPP, ecological survey, wetlands delineation, or environmental study. We anticipate the selected contractor to pay all permit costs.

Behnke will prepare the front end of the specifications, bid the project, and have construction administration responsibilities. During bidding, Behnke will provide clarifications and prepare addenda. For construction and close-out, Behnke will answer RFI's, review shop drawings, and provide clarifications as requested.

For the purposes of this proposal, we will assume an approximate construction budget between \$400,000 and \$500,000 for base bid, depending upon fluctuating asphalt and track surfacing costs. Our fee is approximately 5% of this construction budget.

Fee

We propose to provide the work described in this proposal for a lump sum fee, as follows:

- All-Weather Track \$20,000.00
 \$20,000.00

Schedule

We propose the following bid schedule:

- Board of Education Approval to Bid Project – 9/29/21
- First Advertisement – 10/14/21
- Second Advertisement – 10/21/21
- Pre-Construction Conference – 10/27/21
- Bid Due – 11/4/21
- Behnke Recommendation of Successful Bidder to Board of Education – 11/8/21
- Board Approval of Contractor – 11/17/21

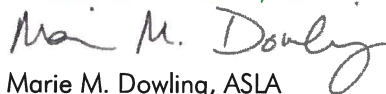

Reimbursables

Normal reimbursable expenses include plotting, printing, copying, mileage, and deliveries to not exceed \$500. We are assuming that all permits will be obtained by the Contractor.

If you have any questions, or need additional information, please call me.

Sincerely,

BEHNKE ASSOCIATES, INC.

Marie M. Dowling, ASLA
Vice-President
