

Nutrition Standards for School Meals

The Healthy, Hunger-Free Kids Act of 2010 required the US Department of Agriculture (USDA) to update federal nutrition standards for school meals. The [updated rules](#) went into effect on July 1, 2012. Since that time, USDA [adjusted](#) whole grain, sodium and milk mandates. The current standards require:

More fruits and vegetables: Schools offer students larger portions of fruits and vegetables with every lunch. Vegetable choices must include weekly offerings of legumes, dark green and red/orange vegetables. Every school breakfast must offer students a full cup of fruits or vegetables. Students are required to take at least one half-cup serving of fruits or vegetables with every school breakfast and lunch.

Whole grains: At least half of the grains offered with school meals must be whole grain-rich (at least 51% whole grain).

Calorie limits: School meals must meet age-appropriate calorie minimums and maximums:

Grades	Breakfast	Lunch
K-5:	350-500 calories	550-650 calories
6-8:	400-550	600-700
9-12:	450-600	750-850

Sodium limits: Schools must gradually reduce sodium levels in school meals to meet the following limits.

Sodium Reduction Target Timeline for School Meals

Grades	Target 1 (July 1, 2014)	Target 2 (July 1, 2024)
School Breakfast Program		
K-5:	≤540 mg	≤485 mg
6-8:	≤600	≤535
9-12:	≤640	≤570
National School Lunch Program		
K-5:	≤1,230	≤935
6-8:	≤1,360	≤1,035
9-12:	≤1,420	≤1,080

Limits on unhealthy fat: Meals cannot contain added trans-fat and no more than 10 percent of calories can come from saturated fat.

Low-fat and fat-free milk: Every school meal offers one cup of fat-free or 1% milk. To meet calorie limits, milk processors have developed flavored milk with less added sugar.

Free water: Free drinking water must be available in the cafeteria during lunch and breakfast.

Smart Snacks in School

Since July 1, 2014, the US Department of Agriculture's [Smart Snacks in School rules](#) have required all foods and beverages sold separate from school meals to meet new nutrition standards. Often referred to as “**competitive foods**,” because they are sold in competition to the complete reimbursable school meal, these items include entrees, sides, snacks or drinks sold during the school day in vending machines, snack bars and a la carte lines. The rules do not apply to food and beverages brought from home or sold during non-school hours, weekends or at off-campus events (e.g. concessions during sporting events and school plays).

Under Smart Snacks in Schools, competitive foods must:

- Be a “whole grain-rich” grain product; or
- Have as the first ingredient a fruit, a vegetable, a dairy product, or a protein food; or
- Be a combination food that contains at least $\frac{1}{4}$ cup of fruit and/or vegetable; or
- Contain 10% of the Daily Value (DV) of one of the nutrients of public health concern in the *2010 Dietary Guidelines for Americans* (calcium, potassium, vitamin D, or dietary fiber).

Foods must also meet several nutrient requirements:

Calorie limits:

- Snack items: ≤ 200 calories
- Entrée items: ≤ 350 calories

Sodium limits:

- Snack items: ≤ 200 mg
- Entrée items: ≤ 480 mg

Fat limits:

- Total fat: $\leq 35\%$ of calories
- Saturated fat: $< 10\%$ of calories
- Trans fat: zero grams

Sugar limit:

- $\leq 35\%$ of weight from total sugars in foods

Nutrition Standards for Beverages:

All schools may sell:

- Plain water (with or without carbonation), no portion limit
- Unflavored or flavored fat-free or low-fat milk and milk alternatives (e.g. soy milk, lactose-free milk)*
- 100% fruit or vegetable juice and
- 100% fruit or vegetable juice diluted with water (with or without carbonation), and no added sweeteners.

Elementary schools may sell up to 8-ounce portions, middle/high schools up to 12-ounces of milk and juice.

High schools may sell additional “no calorie” and “lower calorie” beverage options, including caffeinated beverages. Offerings may include no more than 20-ounce portions of calorie-free, flavored water (with or without carbonation) and other flavored and/or carbonated beverages that contain < 5 calories per 8 fluid ounces or ≤ 10 calories per 20 fluid ounces. High schools may also offer no more than 12-ounce portions of beverages with ≤ 40 calories per 8 ounces, or ≤ 60 calories per 12 ounces.

Fundraisers: States may establish exemptions for items sold at infrequent fundraisers or bake sales.

Local Flexibility: States and/or local schools have the flexibility to maintain or establish their own more stringent standards for competitive foods, if they meet the minimum federal standards.

* [USDA's Child Nutrition Program Flexibilities](#) provided schools the option to offer flavored, 1% milk.*

District or School Information

Each district or school will provide copies of the report available to the public upon request.

State law in Ohio requires each school district board of education and each chartered nonpublic school board or governing authority to adopt and enforce nutrition standards governing the types of food and beverages available for sale on the premises of its schools. Additionally, the board or governing authority must specify the time and place each type of food or beverage is available for sale. The standards specified for beverages and food are minimum standards. Local districts and schools may adopt higher standards.

Each board or governing authority assigns staff to make sure that the district or school meets the nutrition standards in state law. The staff prepares an annual report regarding the district's or school's compliance with the standards. Completion of this survey fulfills the district or school's requirement to report to the Ohio Department of Education its compliance with state law. The board or governing authority must schedule an annual presentation on the report at one of its regular meetings and include the date of the annual presentation in this survey.

* 1. IRN:

043646

* 2. Organization Name:

Brecksville-Broadview Hts. Schools

* 3. By checking this option I attest that...

- ☒ The district or school named above has adopted and is enforcing a nutrition standards policy that considers the requirements of Ohio Revised Code 3313.814 and governs the types of food and beverages that may be sold on the premises of its school(s).
- ☐ The district or school named above has not adopted and/or is not enforcing a nutrition standards policy that considers the requirements of Ohio Revised Code 3313.814 and governs the types of food and beverages that may be sold on the premises of its school(s).

Board or Governing Authority Meeting Presentation

* 4. Date of board or governing authority meeting presentation:

Date MM DD YYYY
