District Heating Ventilation and Air Conditioning
Improvements 2021-2022

Gardiner HVAC Improvements Phase I - \$2.87 million

Existing Middle School HVAC System Replacement:

1. Dual Duct - All classrooms/offices currently serviced by the existing HVAC system to include additional classrooms i.e. 225, 226 received a new HVAC system (12 classrooms)
2. Guidance Office – Was removed from Dual Duct HVAC system and received a new HVAC system which services this area independently
3. Science Rooms - All classrooms currently serviced by the existing HVAC system received a new HVAC system (6 classrooms)
4. The media center and adjacent rooms received a new HVAC system

Middle School HVAC Additions & Replacement:

1. 5th grade and 6th grade classroom unit ventilators were replaced with AC capable unit ventilators (24 classrooms)
2. Cafeteria received new HVAC system and is air conditioned
3. Modified and improved serving area & kitchen HVAC systems

Middle School Boiler Plant #3 – Installation of two high efficiency boilers in this boiler room

High School, Middle School & Education Center Direct Digital Control (DDC) Installation:

1. Primary High School HVAC DDC replacement has occurred
2. Existing High School & Middle School HVAC equipment control integration has occurred (Applied Intelligence diagnostics is occurring with all equipment that did not receive new DDC systems)
3. All new Middle School HVAC equipment received DDC systems
4. Middle School main office, clinic and room 200 received HVAC improvements as a part of the security vestibule renovation and have been tied in to the new DDC systems
5. Primary Education Center HVAC systems received DDC installation
6. Education Center air distribution modification has occurred

Gardiner HVAC Improvements Phase II - \$1.25 million

Existing Middle School HVAC System Replacement:

1. The auditorium and stage area received new HVAC systems
2. The band & choir rooms received new HVAC systems
3. Special needs classrooms 254 and 255 received new HVAC systems

Middle School Boiler Plant #2 – Installation of two high efficiency boilers in this boiler room

Installation of independent AC systems in primary technology server rooms at the High School & Middle School has occurred

Bipolar Ionization was be installed in all High School, Middle School and Education Center HVAC systems

Education Center Ventilation Modification and air balancing has occurred
