

Teacher Salary Schedule Overview

Elements of the salary schedule:

- **Base Pay** - The salary for step 1 column 1 representing the starting pay for a brand new teacher with only a bachelors degree. All other salaries on the schedule are indexed off of this. If you increase Base Pay, every teacher gets the raise.
- **Longevity Steps (vertical)** - Each step normally equates to one year of a teacher's career. A brand new teacher starts at step 1 and will advance one step each year they remain with the district. When a district is under financial pressure, it could negotiate a step freeze where teachers do not advance for certain years.
- **Education Columns (horizontal)** - Each column represents a continuing education milestone for teachers. Once the complete enough continuing education hours, they can advance another column.

There are three ways a teacher can obtain a salary increase:

1. An annual step increase, assuming they have more steps ahead of them with pay increases. Once a teacher earns all available step increases, they are considered "stepped out" unless the schedule is changed through negotiations to add more step increases.
2. A column increase from completing continuing education. Pay adjustments due to column movement occurs twice per year.
3. An annual base pay increase available to every teacher.

Every teacher falls somewhere on the current salary schedule at a certain step and column.

Base pay increases for a contract are referred to by stringing the percentages together. For example, a 2-2-2 would be a three-year contract with 2% base pay increases each year. A zero means 0% or no base pay increase.

The 2010-2012 Contract - One-Year Index Freeze Restored

In the 2010-2012 contract, there was a one-year step and column freeze promoted as a cost savings to the district. However, it was only a one-year deferral resulting in a "double bump" the following year. This type of step freeze produced minimal savings and was more of a PR tactic to get a levy passed. Here was the contract language:

Effective upon ratification of this Agreement there will be an index freeze (steps and education), with teachers to resume their normal step adjustment in 2012-2013 (i.e. teacher on MA at step 10 in 2010-2011 will remain on MA step 10 in 2011-2012 but will move to the appropriate education column and step 12 in 2012-2013). The resumption of the normal step adjustment in 2012-2013 shall occur regardless of a rollover.

The 2012-2016 Contract - Three-Year Step Freeze Unrestored, Insurance Changes - Short-term Cost Savings

In the 2012-2016 contract, there was a real three-year step freeze (not a deferral) with no make-up of steps that produced significant cost savings. There was also an increase in insurance premiums from 10% to 15% and spousal language changes that resulted in \$6M in savings. It was a contentious negotiation that went to the brink of a strike. After three straight new money levies failed following the Great Recession, the savings from this contract allowed the district to postpone new money and repair its financial health. Here was the contract language on steps:

During the term of this Agreement, the attached salary schedule (Attachment A) shall be in effect. For the 2013-14 and 2014-15 school years, no salary step advancement shall occur, and such step freezes shall not be restored in the future. However, column movement based on additional coursework shall be in effect. Normal salary step advancement shall resume upon the expiration of this Agreement.

During the term of this Agreement, the Board shall have the discretionary option of extending the Agreement for the 2015-16 school year, with prior written notice to the BEA President and the OEA Representative on or before June 15, 2015. Should the Board exercise this option, all terms and conditions of the Negotiated Agreement shall remain in effect, and a step freeze shall be in effect for the 2015-16 school year, with the frozen step not restored in the future. Column movement shall also be in effect for the 2015-16 school year.

The 2016-2021 Contract - Second Salary Schedule - Increased Mid-Term Costs For Long-Term Savings

In the 2016-2021 contract, a second salary schedule was introduced to spread out the accelerated step increases over a longer period of time. In general, the old schedule (A) had 5% step increase over 15 years whereas the new schedule (B) has 3% increases over 15 years followed by 2% for another 10 years.

The language was structure so that current teachers have a choice each year to switch from Schedule A to Schedule B. We made the switch more lucrative for most teachers which is why most have now transitioned over to Schedule B. Newly hired teachers automatically go on Schedule B. Once on B, there is no option to go back to A.

Over time, all teachers will end up on B and A can get be retired. The only way for A to get new life is if the Board agrees to new contract language giving A new life. This would be extremely unfortunate as we paid a high price to get Schedule B into the contract.

The long-term savings the district will eventually experience under Schedule B will allow for better financial management by slowing down the rapid pace of salary growth which occurred under Schedule A.

The 2021-2024 Contract – 2.75% Plus One-Time \$600 Stipend For Insurance and Language Changes

We traded money for insurance and language changes which provided some cost savings. Here is a summary of the main elements:

1. 2.75% base increase on Schedule B only (no base increase to A) all three years of the contract, and a one-time \$600 stipend (this stipend at a higher total amount was originally tied to sun setting Schedule A, but for less total money we agreed to spread those dollars among all BEA members, so that BEA could offset increased insurance costs in year one.)
2. Starting January 1, 2022, all members will have a new insurance plan design, which increases the deductible and co-pays for numerous services. For comparison, to get similar savings and keep the same plan design, employee contributions would have had to increase to nearly 20% from 15%.
3. Effective this contract year and thereafter, the Board will no longer pay \$125/month to BEA members whose spouse is enrolled in his/her own plan.
4. BEA members must now enroll in both medical and prescription, and cannot opt out of one or the other, and for those who do not take both, he/she would receive a \$2,000 payment (increased from \$1,500).
5. Schedule A sunsets after this contract cycle and will be deleted from the CBA. Those currently on Schedule A can move any of the three years, and will receive a double step when they move.
6. For new hires, the District no longer has to offer all years of service, but can limit years to five. This is a cost saving device for new hires with experience, and gives you flexibility in hiring.
7. The parties may initiate negotiations between 120-90 days prior to the expiration of a CBA. The first session must be held within 30 days (instead of 15). This timing better aligns with the BOSS notice to negotiate timeline as well.
8. The BEA now has timelines within which they must move a grievance to the next step (they had no timelines previously), and a mutually agreed mediation step is now Step 3 of the grievance process. The goal is to resolve grievances short of arbitration. The language now has a clear process, whereby all discipline starts with a fact gathering meeting, and is followed by a pre-disciplinary hearing. As an aside, administrators will receive training

in August 2021 on this new language, and appropriate process moving forward. The goal is to allow the disciplinary process, in conjunction with adding a mediation step to the grievance procedure, to go more smoothly in the future without chance of procedural missteps. Besides finances, discipline was the most challenging conversation with BEA, given it is an emotional conversation about teacher rights.

9. Starting with the 22-23 school year, start and end times will allow for two-tier busing, the teacher day will be shortened 10 minutes in exchange for a 10-minute shortened lunch at all levels, and the elementary will also have embedded PLC time in the day with administrative control. Elementary planning will increase to 400 minutes per week to align to other grade levels.
10. IEP writing days will now be scheduled by the principal and SPED staff, aligning to the work (i.e., not comp. days), and IEP writing days are not available on dates like before or after a holiday. IEP writing days for two IEPs (versus four) can be taken in ½ day increments. Further, out-of-district evaluations are no longer optional for school psychologists, with no increase in compensation from the current rate.
11. SLPs shall receive ½ day per month for report writing. Further, SLPs are limited in when they can utilize release time, like for IEP writing days (e.g., adjacent to a holiday). Further, the rate of attending out-of-district IEP meetings will be .00065, not .0005, given the impact on the loss of work time.
12. For those who revoke parental leave, the Board can delay reinstatement for four weeks. Adjustments to the carry over process for personal leave were made, thus alleviating burdensome payroll processes. Further, use of personal leave at the end of the school year on Mondays and Fridays is restricted. Language is now deleted that allowed for falsification of sick leave to be treated as a written warning. Language was added to allow for telework in a public health emergency if there is a need to quarantine, but only with prior approval.
