~~5421B — ADJUSTED GRADING PROGRAM~~

~~It is the Brecksville Broadview Heights City School's belief that each student be given the opportunity to develop his/her abilities to the fullest as well as develop a desire to learn. We recognize that all students could experience difficulties, which inhibit or otherwise prevent them from competing with their classmates in a particular class. In order to sustain and maintain a desirable level of motivation to achieve, or to take into account other special circumstances, the students may be given an "adjusted grade".~~

~~The purpose of the "adjusted grading program" is to:~~

- ~~A. Provide a measure of success for those students who cannot, in spite of demonstrated effort, meet the regular course requirements;~~
- ~~B. Better communicate a desire to recognize the pupil who "tries", yet fails, to achieve passing grades as determined by the appropriate grading scale; and/or~~
- ~~C. Communicate a level of academic progress relative to the student's ability.~~

~~The following guidelines will be employed when using the "adjusted grading program":~~

- ~~A. The "adjusted grade" is used discriminately and as a last resort. It should not be used when it is possible for the student to pass the grade or subject under the conventional system. Every effort should be made to help the student reach the minimum passing level of the grade or course before resorting to an "adjusted grade".~~
- ~~B. Primary and Intermediate Grades~~
 - ~~1. All students identified (by IEP or Intervention Based Assistance Team) as having a disability/handicap, which includes students who qualify under Special Education Regulations or those who qualify under Section 504 of the Rehabilitation Act of 1973, shall be given the full range of adjusted grading options: "4 — Exceptional, "3 — Proficient, "2 — Developing, " and "1 — Beginning (grades one (1) and two (2) and Limited Progress (grade three (3)), " and "A" to "F" (grades four (4) and above). For each student, the IEP or Intervention Based Assistance Team will determine whether an adjusted grade is appropriate in a particular class. The IEP or Section 504 Plan will reflect a determination that an adjusted grade is appropriate.~~
 - ~~2. Those students not identified as having a disability/handicap, but are determined by an Intervention Based Assistance Team to benefit from some type of adjustment in grading will have the following "adjusted grade" limitations:~~

~~Primary Grades (through 3rd grade) — grade of "3" (Proficient) or "2" (Developing); Grade 4th through 8th — grade of "C" or lower.~~

3. "Adjusted Program" will be indicated on report cards to parents for students in grades one (1) through five (5). An asterisk will then be placed in the grading period of the academic area in which the grade or program has been adjusted. Report cards to parents for students in grades six (6) through eight (8) will contain asterisks only. A note explaining the meaning of the asterisk is included. These report cards are for parent information only.

C. High School Grades

1. All students identified (by IEP or Intervention Based Assistance Team) as having a disability/handicap, which includes students who qualify under Special Education Regulations or those who qualify under Section 504 of the Rehabilitation Act of 1973, shall be given the full range of adjusted grading options (that is, "A" to "F"). For each student, the IEP or Intervention Based Assistance Team will determine whether an adjusted grade is appropriate in a particular class. The IEP or Section 504 Plan will reflect a determination that an adjusted grade is appropriate.
 2. Those students **not identified** as having a disability/handicap, but are determined by an Intervention Based Assistance Team to benefit from some type of adjustment in grading will have an "adjusted grade" limitation of a grade of "D". High school students who are determined to require an adjusted grade should be taking the course on a "General" level where possible.
 3. High School Resource Room classes will be titled "Basic" courses on their report card and transcript.
 4. A high school student's adjusted grade in a particular subject area will be accompanied with an "Adjusted Grade" indication in the Comment Section of the report card to parents. Those report cards are for parent information only and no adjusted grade designation will appear on a student's transcript.
- D. In general (except in accordance with the IEP's or Section 504 Plans of identified students with disabilities), the "adjusted grade" should be used only after a student has been enrolled in that subject or grade for at least one (1) grading period. Exceptions will be determined by the building principal.
- E. For any student for whom an "adjusted grade" is applicable, it may be used in one (1) or more of his/her academic courses.
- F. The conventional grading system may be used in the course during any nine week grading period following the use of the adjusted grade.
- G. The conventional grading system may be used for the semester or year grades even though the "adjusted grade" was used for a nine week grade, provided the semester or year average is passing according to the conventional system.
- H. For students in the intermediate grades and above, grade point averages (GPA) will include "adjusted grades". Adjusted grades will be included when determining qualification for Merit or Honor Rolls.
- I. "Adjusted grades" should be used only after consultation with and the approval of the building principal and the Intervention Based Assistance Team.
