5421 - GRADING

The Board of Education recognizes its responsibility for providing a system of grading student achievement that can help the student, teachers, and parents judge properly how well the student is achieving the goals of the District's program.

The Board believes that the District's grading system should be a reliable system and one that ensures each student's grades signify accurately his/her degree of accomplishment of those expected learning outcomes which are to be stated for each program at every grade level, kindergarten through twelve.

The Board directs the Superintendent to develop procedures for grading whereby the professional staff:

- A. develops clear, consistent criteria and standards particularly when grades are based on subjective assessment;
- B. helps each student understand in each course or program what behavior and/or achievement is needed to earn each grade as well as what will produce a failing grade;
- C. provides frequent opportunities for each student to obtain information as to his/her progress toward the learning goals of his/her courses or programs;
- D. provides for a pass/fail grade in programs for which it is appropriate;
- E. provides students the opportunity to assess both their own achievements and their areas of difficulty.

The grading system should not inhibit the professional staff member from learning the strengths and weaknesses of each student on an individual basis.

The grading system should be subject to periodic review by staff, students, and parents. Revisions shall be made only when such changes will assure a clearer, more valid, or more reliable system of grading.

Adjusted Grade Program

~~It is the District's belief that each student be given the opportunity to develop his/her abilities to the fullest as well as develop a desire to learn. We recognize that all students could experience difficulties, which inhibit or otherwise prevent them from competing with their classmates in a particular class. In order to sustain and maintain a desirable level of motivation to achieve, or to take into account other special circumstances, the students may be given an "adjusted grade".~~

~~The purpose of the "adjusted grading program" is to:~~

- ~~A. provide a measure of success for those students who cannot, in spite of demonstrated effort, meet the regular course requirements;~~

- B. ~~better communicate a desire to recognize the student who "tries", yet fails, to achieve passing grades as determined by the appropriate grading scale; and/or~~
- C. ~~communicate a level of academic progress relative to the student's ability.~~
