Research Methodology

The 2024 Community Survey was conducted with 400 residents of the Brecksville-Broadview Heights City School District, yielding a 4.9% margin of error at a 95% confidence level. Data Collection began on March 27 and ended on May 6, 2024. The surveys took an average of 14.3 minutes to complete. Most surveys were conducted online via email invitation. The first email invitation was sent on March 27. Subsequent reminder email invitations were sent at varying days of the week and times of day. Recipients who completed the survey or unsubscribed were not sent additional reminder invitations. The final results are representative of district residents.

Executive Summary

PERCEPTION

- ✓ Respondents were asked to rate the importance of eight factors in the success of a school district. Ratings were on a ten-point scale with ten being the most important. The factors rated as most important were *the quality of education students receive* (with a mean of 9.75), followed by *safety and security of schools* (9.49), *preparing students for college* (9.36), and *management of finances* (9.25).
- ✓ Most respondents (85.1%) have a favorable opinion of Brecksville-Broadview Heights City School District, while less than one in eight (11.3%) have an unfavorable opinion. Only a small percentage, 3.6%, had no opinion.
- ✓ When asked to name the greatest strengths of the district, the most popular responses were *quality education* (given by 53.7% of respondents), followed by *teachers/faculty* (40.5%), and *extracurricular activities* (22.3%).
- ✓ Respondents were also asked to name ways the district could improve. The answers given by the most respondents were to *optimize administrative, financial, facilities, traffic decisions* (given by 31.6% of answering respondents), followed by *communicate to parents/community* (16.1%), and *meet needs of all students* (16.1%).

Summary Table: Perception

		%/ Mean	N
Importance to Success of a School District (Means: 10=very important)	Quality of education students receive	9.75	400
	The safety and security of BBH City Schools	9.49	399
	Preparing students for college or career	9.36	400
	Management of finances	9.25	397
	Transparency with district's finances	8.93	399
	Quality of communication with the community	8.84	397
	The extra-curricular programs offered	8.57	398
	Physical condition of the district's schools & facilities	8.36	398
Overall Opinion of BBHCSD	Very favorable	45.2%	400
	Somewhat favorable	39.9%	
	Somewhat unfavorable	8.1%	
	Very unfavorable	3.2%	
	No opinion	3.6%	
Greatest Strengths of BBHCSD (Open end – Top 3)	Quality education	53.7%	341
	Teachers/Faculty	40.5%	
	Extracurricular	22.3%	
How BBHCSD Could Improve (Open end – Top 3)	Optimize administrative, financial, facilities, etc.	31.6%	323
	Communicate to parents/community	16.1%	
	Meet needs of all students	16.1%	

- ✓ When asked to rate their level of agreement with four statements, nearly nine in ten respondents (87.6%) agreed that *"A strong school system has a positive impact on my property value."* More than three quarters agreed that *"Brecksville-Broadview Heights Schools provides a high-quality education to its students"* (78.7%), *"Community residents have pride in our school district"* (77.3%), and *"The quality of the school system had an influence on my decision to live in this community"* (75.2%).
- ✓ Respondents were asked to rate the district on the same eight factors which they previously rated on importance. The factors on which the district rated highest were *safety and security* (with 87.2% of respondents giving a positive rating), followed by *quality of education students receive* (86.2% positive), *preparing students for college or career* (84.9%), and *extra-curricular programs offered* (84.6%). Quality of communication with the community (60.0%) and transparency with the district's finances (55.5%) were rated the lowest.
- ✓ When asked which statement about the district's finances was closest to how they feel, the plurality of respondents (38.2%) agreed that *finances are adequately managed*. Fewer (23.1%) selected *finances could be managed better*. Only a small percentage of respondents (4.8%) said that *finances are being mismanaged*.

Summary Table: Perception			
		%	N
Agreement with Statements (% Agree)	A strong school system has a positive impact on my property value.	87.6%	398
	Brecksville-Broadview Heights City Schools provides a high-quality education to its students.	78.7%	397
	Community residents have pride in our school district.	77.3%	400

Survey Results

PERCEPTION

Respondents were asked to rate the importance of eight factors to the success of a school district on a ten-point scale in which one meant “not at all important” and ten meant “very important.” Each factor is discussed in more detail below.

Importance to Success of a School District

How important do you think each of the following are to the success of a school district on a scale from 1 to 10 where 10 means very important and 1 means not at all important?

Quality of Education- The quality of education that students receive had an average importance rating of 9.75 on a 10-point scale. Groups more likely to think this factor was highly important to the success of the district include college graduates, married respondents, those who are retired or employed full-time, homeowners, respondents ages 45 and over, and those who have lived in the district for 6 or more years.

Safety and Security- The safety and security of the Brecksville-Broadview Heights City Schools had an average importance rating of 9.49 on a 10-point scale. Groups more likely to think this factor was highly important to the success of the district include homeowners and females.

Preparing Students for Future- Preparing students for college or a career had an average importance rating of 9.36 on a 10-point scale. Groups more likely to think this factor was highly important to the success of the district include respondents with some college or more education, those who are married, respondents with an annual income over \$75,000, homeowners, and those with children attending school in the district.

Management of Finances- Management of finances had an average importance rating of 9.25 on a 10-point scale. Groups more likely to think this factor was highly important to the success of the district include college graduates, married respondents, those who are retired or employed full-time, and homeowners.

Transparency with Finances- Transparency with the district's finances had an average importance rating of 8.93 on a 10-point scale. Groups more likely to think this factor was highly important to the success of the district include homeowners, respondents ages 45 and over, and those without children in the home.

Quality of Communication- The quality of communication with the community had an average importance rating of 8.84 on a 10-point scale. Groups more likely to think this factor was highly important to the success of the district include college graduates and homeowners.

Extracurricular Programs- The extra-curricular programs offered including sports and music programs had an average importance rating of 8.57 on a 10-point scale. Groups more likely to think this factor was highly important to the success of the district include married respondents and those with children attending school in the district.

Physical Condition of Facilities- The physical condition of the district's school and facilities had an average importance rating of 8.36 on a 10-point scale. Groups more likely to think this factor was highly important to the success of the district include respondents with a high school diploma or less education, those who are married, and homeowners.

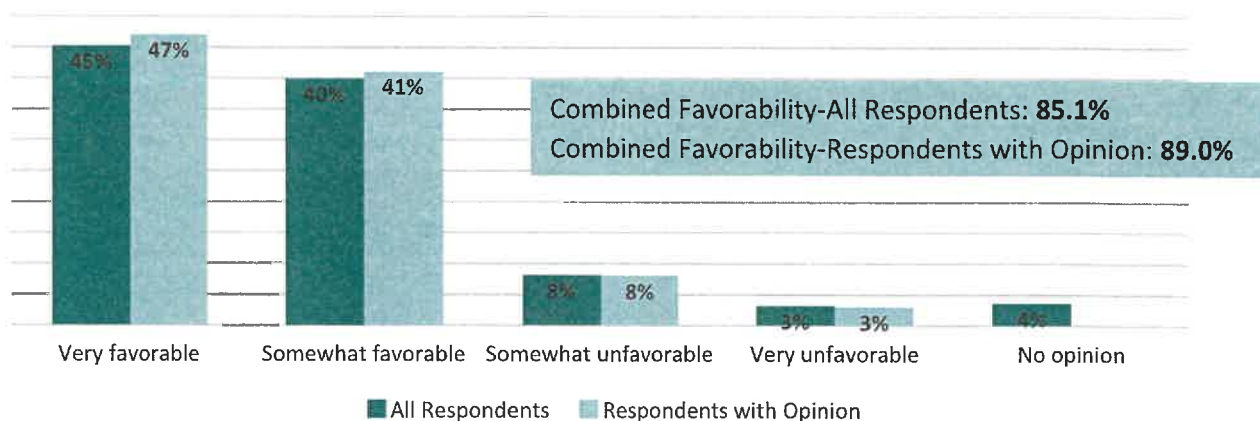

Most respondents (85.1%) have a favorable opinion of Brecksville-Broadview Heights City School District, with 45.2% having a very favorable opinion. Less than one in eight, 11.3%, have an unfavorable opinion. Only a small percentage, 3.6%, did not have an opinion about the district. Respondents over age 65, those with a high level of familiarity (defined as having 3 or more ways of being familiar with the district), those who believe the quality of education in the district have improved, those who perceive that finances in the district are being well managed, and those who self-reported being very familiar with the district were all significantly more likely to have a favorable opinion of the district.

Overall Opinion of BBHCSD

What is your overall opinion of Brecksville-Broadview Heights City School District?

Those with a negative opinion, 11.3% of all respondents, were asked why they felt that way. This was an open-ended question. The most common reasons for rating the district negatively were that they disagree with the controversial ideologies being presented in the schools and they feel that all student needs are not being met, each mentioned by 17.1% of respondents with a negative opinion. Other reasons for having a negative opinion include, in order of importance, students have bad behavior (14.6%), large class sizes (12.2%), and the focus is not on academics (12.2%).

Reason for Unfavorable Opinion			
	N	% of answerers	% ALL respondents
Disagree with controversial ideologies being presented	7	17.1%	1.8%
All students' needs are not met	7	17.1%	1.8%
Students have bad behavior	6	14.6%	1.5%
Large class size	5	12.2%	1.3%
Focus is not on academics	5	12.2%	1.3%
Teachers need improvement	3	7.3%	0.8%
No career prep	3	7.3%	0.8%
Lack of communication with parents	3	7.3%	0.8%
Question financial decisions	2	4.9%	0.5%
Total	41	(n=41)	(n=400)

Doing a good job	8	2.5%	8	2.5%
Total	323	(n=323)	471	(n=323)

What are some ways that Brecksville-Broadview Heights City School District could improve?

Respondents were given three different statements and asked how much they agree or disagree with each. Each statement is discussed in more detail below.

Agreement with Statements

How much do you agree or disagree with each of the following statements?

Strong Schools Improve Property Values- Most respondents, 87.6%, agreed that *“A strong school system has a positive impact on my property value,”* with 59.9% strongly agreeing. Less than a tenth, 8.8%, disagreed. Groups of respondents more likely to agree with this statement include college graduates, married respondents, those with an annual income over \$75,000, homeowners, and respondents with children in the home.

High Quality Education- More than three-quarters of respondents, 78.7%, agreed that *“Brecksville-Broadview Heights City Schools provides a high-quality education to its students,”* with 39.5% strongly agreeing. Nearly a tenth, 9.7%, disagreed. Groups of respondents more likely to agree with this statement include married respondents, those who are employed full-time, and respondents with children in the home.

Community Pride- Slightly fewer respondents, 77.3%, agreed that *“Community residents have pride in our school district,”* with 31.5% strongly agreeing. Less than a tenth, 8.3%, disagreed. Groups of respondents more likely to agree with this statement include college graduates, and respondents ages 18 to 44.

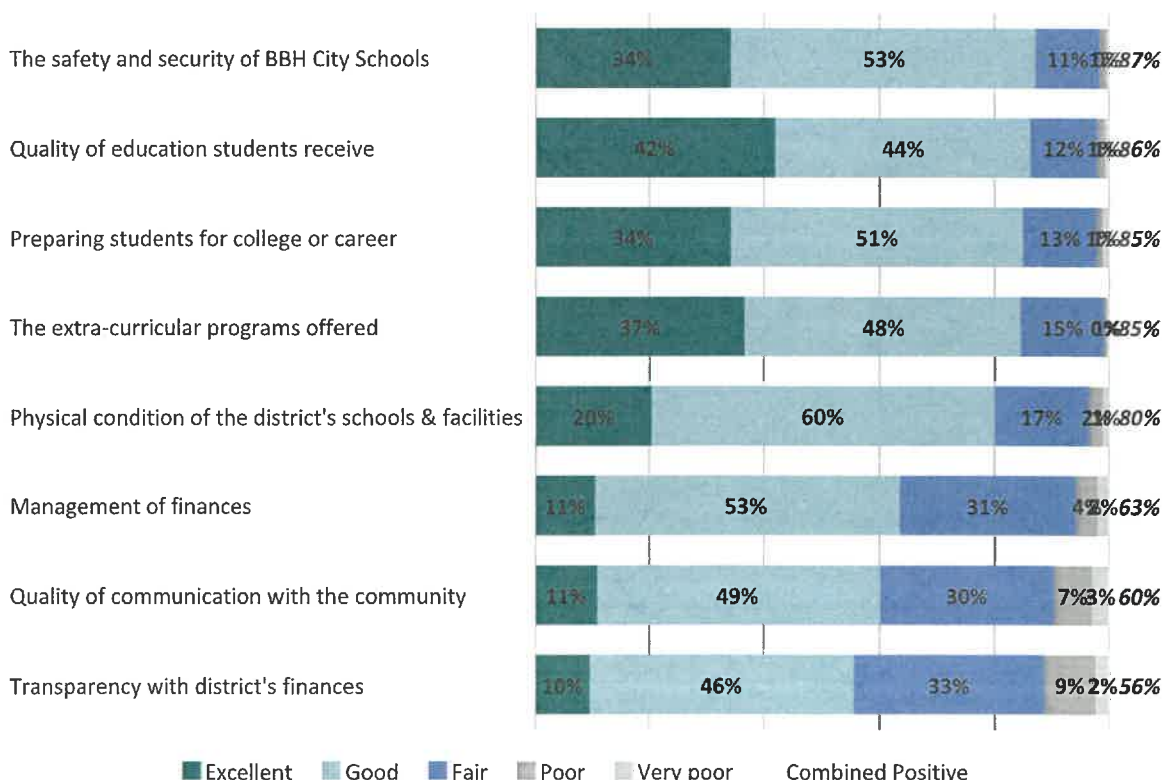

School Influence Decision of Where to Live- Three-quarters of respondents, 75.2%, agreed that *“The quality of the school system had an influence on my decision to live in this community,”* with 52.2% strongly agreeing. More than a tenth, 11.1%, disagreed. Groups of respondents more likely to agree with this statement include college graduates, married respondents, those who are employed, those with an annual income over \$75,000, homeowners, respondents ages 18 to 44, and those with children in the home.

Respondents were asked to rate the district on the same eight factors for which they previously rated on importance. Each factor is discussed in more detail below.

Ratings of BBHCSD

How you would rate Brecksville-Broadview Heights City Schools in each of the following areas?

Safety and Security- Most respondents, 87.2%, rated *the safety and security of the Brecksville-Broadview Heights City Schools* favorably with 34.2% rating it as excellent. Only a small percentage, 1.6%, rated this factor as poor or very poor. Groups more likely to rate safety and security favorably include respondents with some college or more education, married respondents, those who are employed full-time, respondents with an annual income of \$75,000 or more, and homeowners.

Quality of Education- Slightly fewer, 86.2%, rated *the quality of education that students receive* positively with 41.9% rating it as excellent. Only a small percentage, 2.0%, rated this factor as poor or very poor. Groups more likely to rate the quality of education favorably include respondents with some college or more education, married respondents, those who are retired or employed full-time, homeowners, and those with children attending a district school.

Preparing Students for Future- Most respondents, 84.9%, rated *Preparing students for college or a career* favorably with 34.2% rating it as excellent. Only a small percentage, 2.0%, rated this factor as poor or very poor. Groups more likely to rate preparing students for the future favorably include married respondents, homeowners, and those with children attending a district school.

Extracurricular Programs- Slightly fewer, 84.6%, rated *the extra-curricular programs offered including sports and music programs* favorably with 36.6% rating it as excellent. Only a small percentage, 0.7%, rated this factor as poor or very poor. Groups more likely to rate extracurricular activities favorably include employed respondents, respondents ages 45 and over, and those with children attending a district school.

Physical Condition of Facilities- More than three-quarters, 79.9%, rated *the physical condition of the district's school and facilities* favorably with 20.4% rating it as excellent. Only a small percentage, 3.4%, rated this factor as poor or very poor. Groups more likely to rate the physical condition of facilities favorably include college graduates, married respondents, those who are retired, homeowners, and respondents ages 65 and over.

Management of Finances- Less than two-thirds, 63.5%, rated *Management of finances* favorably with 10.5% rating it as excellent. Only a small percentage, 5.6%, rated this factor as poor or very poor. Groups more likely to rate management of finances favorably include respondents ages 65 and over, those with children attending a district school,

Quality of Communication- Slightly fewer, 60.0%, rated *the quality of communication with the community* favorably with 10.9% rating it as excellent. Nearly a tenth, 9.5%, rated this factor as poor or very poor. Groups more likely to rate the quality of communication favorably include those with children attending a district school.

Transparency with Finances- More than half, 55.5%, rated Transparency *with the district's finances* favorably with 9.6% rating it as excellent. More than a tenth, 11.3%, rated this factor as poor or very poor. Groups more likely to rate transparency with the district's finances favorably include respondents who are retired or unemployed.

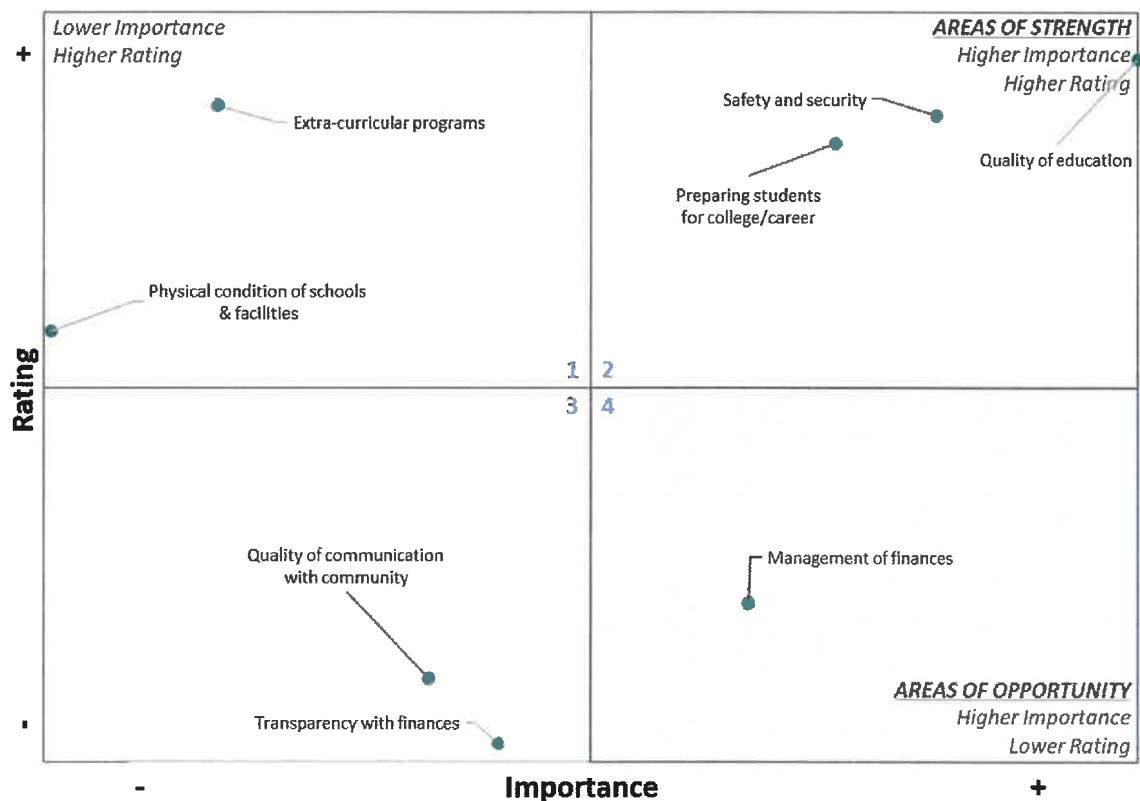

Strengths and Opportunities

In the following grid, key factors are arranged by relative importance to other factors and ratings of Brecksville-Broadview Heights City School District given by respondents. Factors rated as higher in importance appear on the right half of the grid, while factors for the district rated higher appear in the top half. Factors in the bottom right section represent those that are rated high in importance and where the city was rated lower.

- 1: Lower in Importance, Higher Rating
- 2: Higher in Importance, Higher Rating (Areas of strength)
- 3: Lower in Importance, Lower Rating
- 4: **Higher in Importance, Lower Rating (Areas of opportunity)**

For BBHCS D the following are areas of STRENGTH: (1) the quality of education the students receive, (2) the safety and security of BBH City School, and (3) preparing students for college or a career. The only opportunity identified for the district was the management of finances.

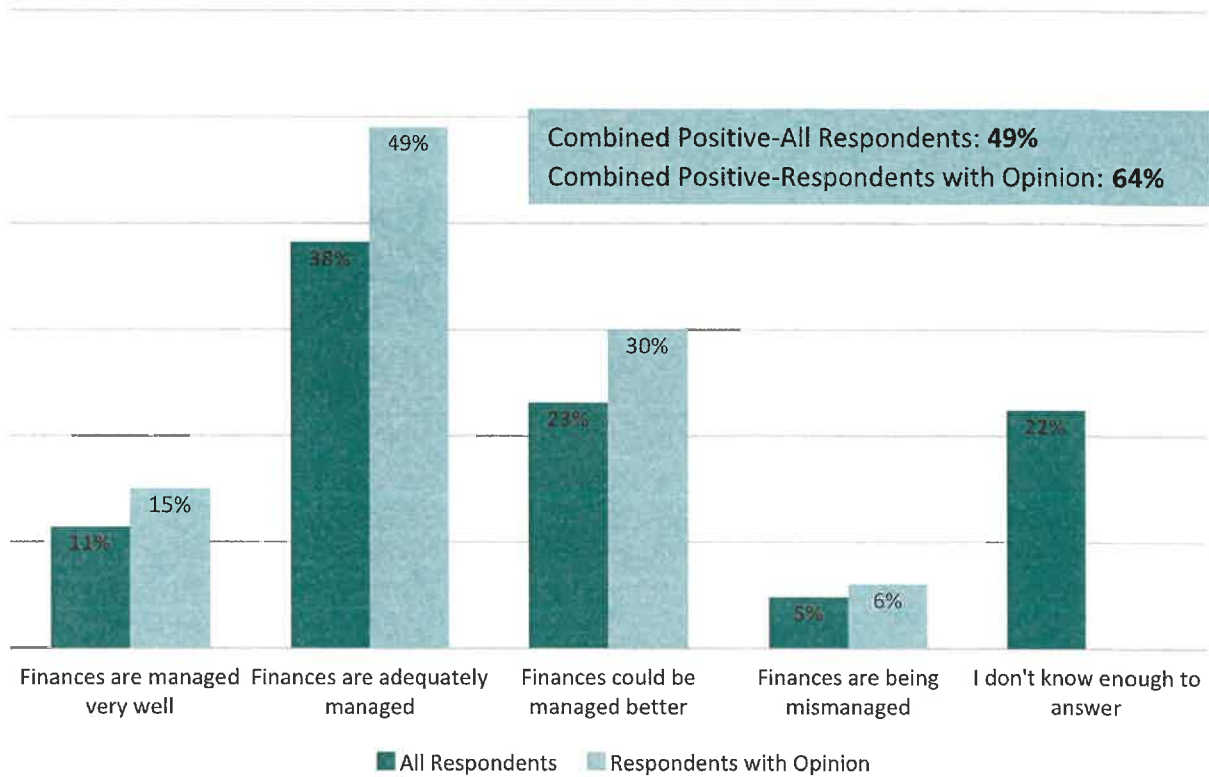

Strengths and Opportunities Grid

When asked which statement about the district's finances was closest to how they feel, the plurality of respondents (38.2%) agreed that *finances are adequately managed*. Fewer (23.1%) selected *finances could be managed better*. Less than one in twenty (4.8%) said that *finances are being mismanaged*. Respondents with a high level of familiarity with the district, those who have a very favorable opinion of the district, those who think the quality of education in the district has improved, and those who self-reported being very familiar with the district were all significantly more likely to believe finances are being managed well.

Feeling about How Finances are Managed

Which of the following statements comes closest to how you feel about the way finances are managed in the district?

FUTURE PRIORITIES AND OUTCOMES

Next, respondents were asked what they thought were the most important skills and abilities that students need to have or learn to be prepared for a successful future after graduation. This was an open-ended question in which the respondent could give multiple responses. The most important skills and abilities for students to learn included, in order of importance, *well-rounded education* (given by 63.2% of respondents), *daily living skills* (47.3%), *communication skills* (39.5%), *self-esteem* (37.6%), *social skills* (35.9%), *critical thinking* (34.1%), *integrity* (31.4%), and *financial skills* (28.1%). Other skills and abilities are listed in the table below.

Most Important Skills for Students				
	First	First %	Total	Total %
Well-rounded education	79	21.4%	234	63.2%
Daily living	67	18.1%	175	47.3%
Communication	47	12.7%	146	39.5%
Self-esteem	19	5.1%	139	37.6%
Social	21	5.7%	133	35.9%
Critical thinking	55	14.9%	126	34.1%
Integrity	12	3.2%	116	31.4%
Financial	35	9.5%	104	28.1%
Value of all persons/cultures	5	1.4%	72	19.5%
Literacy	22	5.9%	54	14.6%
Technology	8	2.2%	43	11.6%
Total	370	(n=370)	1,342	(n=370)

What do you think are the most important skills and abilities that students need to have/learn to be prepared for a successful future after graduation?

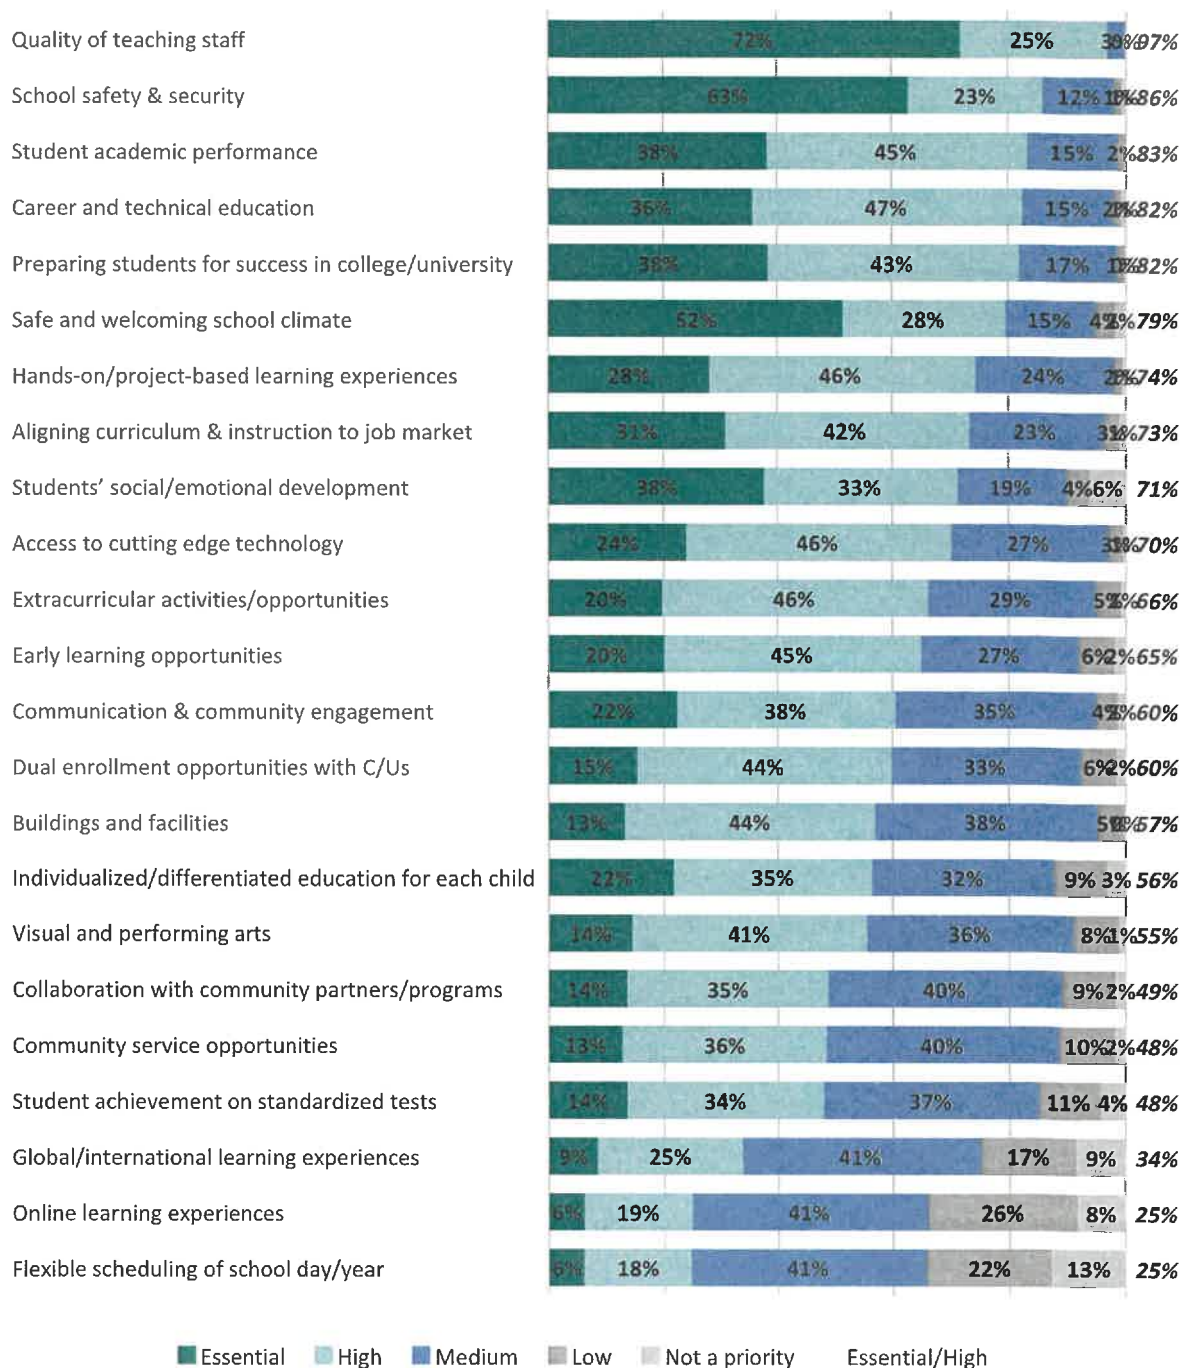

STRATEGIC PLAN PRIORITIES

Respondents were asked to rate twenty-three priorities for the district's strategic plan on a scale from not a priority to essential. Each priority is discussed in more detail below.

Perceived Priorities for Strategic Plan

How much of a priority should each of the following be given in the Brecksville-Broadview Heights City Schools' new strategic plan?

Quality of Teaching Staff- Most respondents, 96.6%, reported *the quality of teaching staff* as highly important to the strategic plan with 23.1% rating it as a high priority and 71.7% rating it as essential. Only one respondent felt that the quality of teaching staff was a low priority or not a priority at all. Groups more likely to rate the quality of teaching staff as a high priority or essential include respondents who are married, divorced, or widowed, those with an annual income over \$75,000, homeowners, and respondents with children who attend a school in the district.

School Safety and Security- Most respondents, 85.9%, reported *School safety and security* as highly important to the strategic plan with 23.1% rating it as a high priority and 62.8% rating it as essential. Only a small percentage of respondents, 2.2%, felt that school safety and security was a low priority or not a priority at all. Groups more likely to rate school safety and security as a high priority or essential include homeowners, females, and respondents who have lived in the district for 11 or more years.

Student Academic Performance- Slightly fewer respondents, 83.2%, reported *Student academic performance* as highly important to the strategic plan with 45.0% rating it as a high priority and 38.2% rating it as essential. Only a small percentage, 1.7%, felt that student academic performance was a low priority or not a priority at all. Groups more likely to rate student academic performance as a high priority or essential include respondents with some college education, homeowners, those ages 45 and over, females, divorced respondents, and those with an annual income of \$75,000 to \$100,000.

Career and Technical Education- Most respondents, 82.3%, reported *Career and Technical Education* as highly important to the strategic plan with 46.6% rating it as a high priority and 35.7% rating it as essential. Only a small percentage of respondents, 2.4%, felt that career and technical education was a low priority or not a priority at all. Groups more likely to rate career and technical education as a high priority or essential include retired respondents, those ages 45 and over, and respondents with an annual income of \$25,000 to \$100,000.

Preparing for College- Slightly fewer respondents, 81.8%, reported *Preparing students for success in college or university* as highly important to the strategic plan with 43.4% rating it as a high priority and 38.4% rating it as essential. Only a small percentage, 1.7%, felt that preparing students for success in college or university was a low priority or not a priority at all. Groups more likely to rate preparing students for success in college or university as a high priority or essential include college graduates, married respondents, those with an annual income over \$100,000, homeowners, respondents ages 45 to 64, and those with children who attend a school in the district.

School Climate- More than three quarters of respondents, 79.4%, reported a *Safe and welcoming school climate* as highly important to the strategic plan with 27.9% rating it as a high priority and 51.5% rating it as essential. Less than a tenth of respondents, 5.5%, felt that a safe and welcoming school climate was a low priority or not a priority at all. Groups more likely to rate a safe and welcoming school climate as a high priority or essential include married respondents, those with children who attend a school in the district, and females.

Hands-On Learning- Less than three quarters of respondents, 74.2%, reported **Hand-on/Project-based learning experiences** as highly important to the strategic plan with 46.2% rating it as a high priority and 27.9% rating it as essential. Only a small percentage of respondents, 2.1%, felt that hands-on/project-based learning opportunities was a low priority or not a priority at all. There are no statistically significant differences in this area.

Aligning to Job Market- Slightly fewer respondents, 73.0%, reported **Aligning curriculum and instruction to the job market** as highly important to the strategic plan with 42.3% rating it as a high priority and 30.7% rating it as essential. Only a small percentage, 3.9%, felt that aligning curriculum and instruction to the job market was a low priority or not a priority at all. Groups more likely to rate aligning curriculum and instruction to the job market as a high priority or essential include respondents with some college education, those ages 45 and over, and respondents who have lived in the district for 6 or more years.

Social/Emotional Development- Less than three quarters of respondents, 71.0%, reported **Students' social/economic development** as highly important to the strategic plan with 33.4% rating it as a high priority and 37.6% rating it as essential. About one in ten of respondents, 10.3%, felt that students' social/emotional development was a low priority or not a priority at all. Groups more likely to rate students' social/emotional development as a high priority or essential include respondents with less than a college diploma, those who are not married, homeowners, respondents with children who attend a school in the district, and females.

Access to Technology- Slightly fewer respondents, 70.0%, reported **Access to cutting edge technology** as highly important to the strategic plan with 46.1% rating it as a high priority and 23.9% rating it as essential. Only a small percentage, 3.1%, rated access to cutting edge technology as a low priority or not a priority at all. Groups more likely to rate access to cutting edge technology as a high priority or essential include respondents ages 65 and over, and respondents who have lived in the district for 20 or more years.

Extracurriculars- Two-thirds of respondents, 66.0%, reported **Extracurricular activities/opportunities** as highly important to the strategic plan with 46.3% rating it as a high priority and 19.7% rating it as essential. Only a small percentage of respondents, 5.4%, felt that extracurricular activities/opportunities was a low priority or not a priority at all. Groups more likely to rate extracurricular activities/opportunities as a high priority or essential include respondents with an annual income over \$50,000, and those with children who attend a school in the district.

Early Learning Opportunities- Slightly fewer respondents, 64.8%, reported **Early Learning Opportunities** as highly important to the strategic plan with 44.7% rating it as a high priority and 20.1% rating it as essential. Less than a tenth of respondents, 8.2%, felt that early learning opportunities was a low priority or not a priority at all. Respondents ages 18 to 44 were more likely to rate early learning opportunities as a high priority or essential.

Communication and Engagement- Less than two-thirds of respondents, 60.4%, reported **Communication and community engagement** as highly important to the strategic plan with 38.1% rating it as a high priority and 22.3% rating it as essential. Only a small percentage of respondents, 5.2%,

felt that communication and community engagement was a low priority or not a priority at all. Females were more likely to rate communication and community engagement as a high priority or essential.

Dual Enrollment- Slightly fewer respondents, 59.7%, reported **Dual enrollment opportunities with colleges/universities** as highly important to the strategic plan with 44.4% rating it as a high priority and 15.3% rating it as essential. Less than a tenth of respondents, 7.9%, felt that dual enrollment opportunities was a low priority or not a priority at all. Groups more likely to rate dual enrollment opportunities as a high priority or essential include respondents who are divorced or living with a partner (not married), and those with an annual income of \$25,000 to \$100,000.

Building and Facilities- More than half of respondents, 56.7%, reported **Buildings and facilities** as highly important to the strategic plan with 43.5% rating it as a high priority and 13.2% rating it as essential. Only a small percentage of respondents, 4.9%, felt that buildings and facilities was a low priority or not a priority at all. Respondents with children who attend a school in the district are more likely to rate buildings and facilities as a high priority or essential.

Individualized Education- Slightly fewer respondents, 56.2%, reported **Individualized/differentiated education for each child** as highly important to the strategic plan with 34.5% rating it as a high priority and 21.7% rating it as essential. More than a tenth of respondents, 12.3%, felt that individualized education was a low priority or not a priority at all. Groups more likely to rate individualized education as a high priority or essential include respondents ages 18 to 44, those with children who attend a school in the district, and respondents who have lived in the district for less than 20 years.

Visual/Performing Arts- More than half of respondents, 55.3%, reported **Visual and performing arts** as highly important to the strategic plan with 40.9% rating it as a high priority and 14.4% rating it as essential. Nearly one in ten respondents, 9.0%, felt that visual/performing arts was a low priority or not a priority at all. Groups more likely to rate visual/performing arts as a high priority or essential include respondents with post graduate education and respondents with children who attend a school in the district.

Community Collaboration- Less than half of respondents, 48.5%, reported **Collaboration with community partners/programs** as highly important to the strategic plan with 35.1% rating it as a high priority and 13.5% rating it as essential. More than one in ten respondents, 11.0%, felt that community collaboration was a low priority or not a priority at all. Groups more likely to rate community collaboration as a high priority or essential include respondents who are not married, and females.

Community Service Opportunities- Slightly fewer respondents, 48.2%, reported **Community service opportunities** as highly important to the strategic plan with 35.5% rating it as a high priority and 12.7% rating it as essential. More than a tenth of respondents, 11.5%, felt that community services opportunities was a low priority or not a priority at all. Groups more likely to rate community service opportunities as a high priority or essential include respondents with less than a college diploma, those who are not married, and females.

Standardized Tests- Less than half of respondents, 47.8%, reported **Student achievement on standardized tests** as highly important to the strategic plan with 34.3% rating it as a high priority and 13.5% rating it as essential. Nearly a sixth of respondents, 15.0%, felt that student achievement on

standardized tests was a low priority or not a priority at all. Groups more likely to rate student achievement on standardized tests as a high priority or essential include retired respondents, those ages 45 and over, and respondents without children in the home.

Global Learning Experiences- A third of respondents, 33.5%, reported *Global/international learning experiences* as highly important to the strategic plan with 25.0% rating it as a high priority and 8.5% rating it as essential. A quarter of respondents, 25.1%, felt that global learning experiences was a low priority or not a priority at all. Groups more likely to rate global learning experiences as a high priority or essential include college graduates, those who are divorced or living with a partner (not married), and respondents who are employed full-time.

Online Learning Experiences- Less than a quarter of respondents, 24.7%, reported *Online learning experiences* as highly important to the strategic plan with 18.6% rating it as a high priority and 6.1% rating it as essential. More than a third of respondents, 34.1%, felt that online learning experiences was a low priority or not a priority at all. Groups more likely to rate online learning experiences as a high priority or essential include respondents with some college education, retired respondents, those with an annual income under \$50,000, respondents ages 65 and over, those without children in the home, and respondents who are living with a partner but not married.

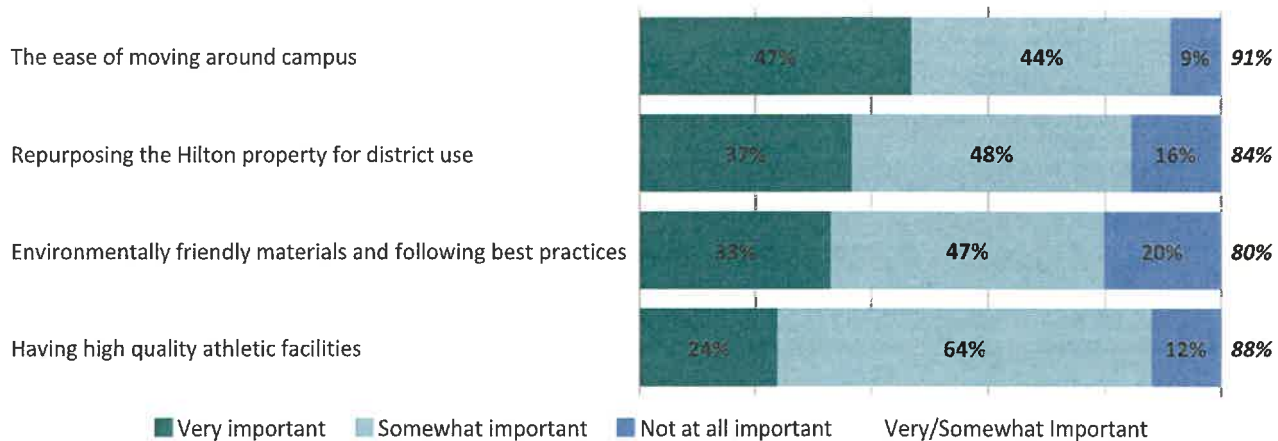

Flexible Scheduling- Slightly fewer respondents, 24.5%, reported *Flexible scheduling of school day/year* as highly important to the strategic plan with 18.4% rating it as a high priority and 6.0% rating it as essential. More than a third of respondents, 34.4%, felt that flexible scheduling was a low priority or not a priority at all. Respondents with a high school diploma or less education were more likely to rate flexible scheduling as a high priority or essential.

Respondents were also asked about the importance of different aspects of the Master Campus Planning study to determine the best uses of district buildings, roadways, and other physical amenities in the future. Each aspect of the plan is discussed in more detail below.

Importance as Part of Plan

How important do you think it is for each of the following to be addressed as part of the plan?

Ease of Moving Around Campus- Most respondents, 91.2%, felt that it was important to address the *Ease of moving around campus, whether walking or driving* as part of the Master Campus Planning study with 46.8% rating it was very important. Less than one tenth of respondents, 8.8%, felt this was not at all important to address. Groups of respondents more likely to report that it was very important for this aspect to be addressed as part of the plan include respondents with some college education, those who are employed full-time, respondents ages 18 to 44, those who have lived in the district for under 20 years, and respondents with children in the home.

Athletic Facilities- Slightly fewer respondents, 87.9%, felt that it was important to address having *High quality athletic facilities* as part of the Master Campus Planning study with 23.9% rating it was very important. More than a tenth of respondents, 12.1%, felt this was not at all important to address. Groups of respondents more likely to report that it was very important for this aspect to be addressed as part of the plan include married respondents and those with children in the home.

Repurposing Hilton Property- Most respondents, 84.4%, felt that it was important to address the *Repurposing the Hilton property for district* as part of the Master Campus Planning study with 36.6% rating it was very important. About a sixth of respondents, 15.6%, felt this was not at all important to address. Respondents with children in the home were more likely to report that it was very important for this aspect to be addressed as part of the plan.

Environmentally Friendly Materials- More than three quarters of respondents, 79.7%, felt that it was important to use *Environmentally friendly materials and follow environmental best practices* as part of the Master Campus Planning study with 33.0% rating it was very important. About a fifth of respondents, 20.3%, felt this was not at all important to address. Groups of respondents more likely to

report that it was very important for this aspect to be addressed as part of the plan include respondents with less than a college diploma, those who are not married, respondents who have lived in the district for 6 to 20 years, and females.
