Honors Video Production

District Overview of Content

Journalism and Video production is a course designed to explore the facets of both video journalism as well as video production. Students experience a diverse framework of ideas while learning how to produce broadcast journalism through the creation of the high school announcements, as well as producing longer term documentaries that run the course of a semester. Additionally, students learn the skills of how to produce a variety of different film styles including, but not limited to, suspense films, commercials and marketing, social media and content creation, and more. Throughout this process students learn the skills of writing, editing using different content creation platforms, shot composition, lighting, sound editing, narration, voiceover, and more. The honors section of this course will focus more specifically on creating professional content. Students will produce advertisements, media, and other products for the school. This will mimic career responsibilities of journalistic as well as creative content creators. These videos will include documentaries, advertisements, promotions and more. The goal of the honors course is to give students hands-on, real world experience which builds a practical portfolio for students going forward into college and careers. Students are expected to produce professional quality work that can be consistently published to the community, as well as used for resumes and portfolios.

All of these skills are taught through the framework of the Ohio English Language Arts standards as this is an English Elective. Students practice writing standards, communication standards, as well as literature and informational standards as students study and examine high quality examples of each unit's content. In this elective, students learn to take English Language Arts skills and use and present them in a practical and career driven way. These skills directly relate to a variety of professions that are creative, journalistic, business related and more. Students also learn elements of media law so that they understand how to work responsibly with journalism and media creation. Students are expected to scaffold their understanding and work with a superior understanding of these standards. Students' work should be concise and engaging, showing an understanding of interpersonal communication and depth in skill of multimedia presentations.

This course aims to equip students with the skills necessary to produce compelling and informative video journalism as well as creative and business driven film pieces. Students will learn about the principles of journalism, video production techniques, and how to effectively communicate complex ideas through multimedia formats. Emphasis will be placed on research, writing, collaboration, and presentation skills. Student work is expected to be consistently published to the public and be at or near professional levels for each of these principles.

Course Objectives:

 - b. Apply grades 11–12 Reading standards to literary nonfiction (e.g., “Delineate and evaluate the reasoning in seminal U.S. texts, including the application of constitutional principles and use of legal reasoning [e.g., in U.S. Supreme Court Case majority opinions and dissents] and the premises, purposes, and arguments in works of public advocacy [e.g., The Federalist, presidential addresses]”).

 - d. Use appropriate and varied transitions and syntax to link the major sections of the text, create cohesion, and clarify the relationships among complex ideas and concepts.
