~~7541 -- ELECTRONIC DATA PROCESSING DISASTER RECOVERY PLAN~~

~~The Board of Education is committed to maintaining and protecting the District's Information System. The Board believes that a complete and accurate Information System which includes educational, student, fiscal and personnel information is vital to the Board's ability to deliver uninterrupted educational service to the community it represents. To that end, the Superintendent, in conjunction with the Treasurer/CFO, is directed to develop, test and maintain an Electronic Data Processing Disaster Recovery Plan for use in the event a disaster should disable the District's electronic data processing equipment.~~
